8TH MARCH 1890, No. 772 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers:—

From Colonel H. M. VIBART, R.E., Superintending Engineer, IV Circle, to the Chief Engineer, Public Works Department, dated Ootacamund, 6th November 1889, No. 497 E.W.

With reference to your memorandum No. 819 D., dated 5th September 1889, I have the honor to submit an estimate, amounting to Rs. 1,270, for discharging the washings of the Murree Brewery Company buildings into the pipe sewer at Ootacamund.

2. Colonel Thompson reports that nearly all the waste water from the Brewery is collected in a cistern and thence discharged from a pipe leading from the Brewery under the surface of the Polo ground to the Bazaar sewer, into which it is discharged.

3. A small amount of waste water, viz., from malt washings and drainage from "grains" is not at present got rid of in this way and finds its way into the lake, but it can be easily conducted to the cistern above referred to and discharged by the pipe under the Polo ground into the Bazaar sewer.

4. The cistern and pipe are amply large enough to discharge this additional waste water.

From Major D. McNEIL CAMPBELL, R.E., Superintending Engineer, IV Circle, to the Chief Engineer, Public Works Department, dated Coimbatore, 5th February 1890, No. 44 E.W.

Adverting to your memorandum No. 5222 C., of 12th November 1889, I have the honor to state that the arrangements for disposing of the waste water proposed by the Executive Engineer appear good, and I can see no cheaper way of doing it.

2. For more information on this subject, I beg to refer you to my notes of inspection for January 1890.

ENCLOSURE.

EXTRACT of paras. 7 and 8 from Inspection notes of Major D. McNEIL CAMPBELL, R.E., Superintending Engineer, IV Circle, for January 1890.

Para 7. 26th—*Waste water from the Murree Brewery.*—The arrangements for disposing of the waste water proposed by the Executive Engineer appear good, and I can see no cheaper way of doing it. The estimate, which amounts to Rs. 1,270, was submitted to the Chief Engineer with this office No. 497 E.W., dated 6th November 1889.

8. It does not appear clear to me why this department should have anything to do with the work. I should think it would be sufficient if the Municipality insisted on the Brewery Company disposing of the waste water and refuse so as not to be a nuisance or contaminate the water in the lake.

ORDER—dated 8th March 1890, No. 772 W., Public Works.

The Government sees no reason why the cost of the work estimated for by the Executive Engineer should be borne by the State. The Murree Brewery Company will be informed by the Collector that they cannot be permitted to discharge offensive matter into the lake.

Memo:
Memo

Re: S. E. letter

2P According to the
S. E. letter, the estimate
now submitted seems
unnecessary, and it
would appear that
a small expenditure
is all that is necessary
to divert from the
Lake, the drainage
which escapes into
it from the Brewery.

2 The S. E. requested
to report more fully
on this point.

 8 Read the following

From the Supy. Engr to Circle - N^o 497 Engr of 6th Nov 1889.
 do do do N^o 46 Engr of 5th Feb 1890.
 Extract from notes of inspection by the Supy. Engineer
 to Circle for January 1890.

For readers.

I think we must not
 indicate how the work
 to be done. It is simply
 tell the Brewery Co to discharge
 in all cases the discharge
 of the water into
 the lake - C

But this is

It was in the file - 9
 in the file - has now been placed
 on the top.

This estimate was
 called for in memo N^o 819 D
 of 5th September 1889, and the
 call was based on the notes
 by the Hon. members of Govt.
 an original G. O. No. 24720
 of 6th Sept 1889.

2. The question for decision
 now is the incidence of
 the charge, and whether
 the work should be assessed
 out by the Municipality
 or the P.W Department.

I see no reason why Govt should
 pay for this work, the cost of which
 should fall on the Brewery who
 cannot be allowed to discharge
 offensive matter into the lake.
 The Minister should be ordered
 to call upon the Company either
 to execute or pay for the work.

 U.S.
 7 Mar

U.S.
 11.2.90. Ruesch
 11.2.90

It came from Col. Vibert's letter
 of Nov 6th 89 N^o 497 that there is
 a system at the Brewery where
 the drainage is collected in a pipe
 under the foreground in a pipe
 which discharges into the sewer
 on the N.W. side of the ground - &
 he points out that it is not
 difficult for the Brewery Co to divert
 the drainage from the mill-house etc
 which now runs in an open drain
 round the A.B. ground, to the eastern
 side of the mill-house. If this can be done
 that is all that is wanted
 in any case the sewer
 is now the Govt's

Work. The Col. will catch
 in the 22 to 25 miles (the distance)
 discharging water from the River
 into the lake & discharging into the
 already existing pipe & drain in
 by the river & the pipe drain to
 carry it into the river.
