GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.  
Account.

READ—the following papers:—

From H. H. O'CONNELL, Esq., Executive Engineer, Nellore Division, to the Superintending Engineer, II Circle, dated 14th November 1889, No. 500.

With reference to your endorsement No. 185 G.L., of the 22nd July last, on G.O., No. 1733 W., of the 1st idem, calling for further information in connection with land and kiln estimates, I have the honor to inform you as follows.

2. *Land and Kilns, Brick manufacture, Nellore.*—With regard to this, the outlay to date is Rs. 2,610 and the amount already adjusted amounts to Rs. 823, leaving a balance of Rs. 1,787 to be cleared. This cannot be done unless 8 to 10 lakhs more of bricks are made, but nearly all the bricks required for the Collector's cutcherry are already prepared. There are no other works nor is there at present a prospect of any being sanctioned for some years for which bricks might be made.

3. There are but two alternatives to get out of the difficulty, viz.:—

- (1) To write-off the balance after disposal of the existing assets.
- (2) To enhance the value of bricks already manufactured and brought on to stock or to materials at site of works.

4. The outturn of bricks from the manufacture, to which the above land and kiln account is subsidiary, is—

|                                |     |     |     |     |     |     | RS. | A. | P. |
|--------------------------------|-----|-----|-----|-----|-----|-----|-----|----|----|
| Bricks, 1st class, 238,000, at | ... | ... | ... | ... | ... | ... | 10  | 0  | 0  |
| Do. 2nd „ 440,000, at          | ... | ... | ... | ... | ... | ... | 6   | 5  | 0  |

5. In the event of the second alternative being approved, part of the 2nd-class bricks will be classed 1st class, value raised and a portion of the debit cleared. There was no fixed rule or data for determining the classification. The two classes were and are being used on the Collector's cutcherry and other buildings and the chief difference consists only in the color the material presents to the view.

6. This land and kiln account exists from April 1885, and I regret the outlay was not restricted to requirements.

7. *Land and Kilns, Stone manufacture, Pennér Anicut.*—I have had the accounts of this undertaking overhauled from the beginning, i.e., from January 1886, and I find that the present estimate requires revision, and unless revised it cannot answer the conditions under which land and kiln accounts can be sanctioned.

8. I therefore submit a revised estimate for Rs. 11,500 in lieu of the present one of Rs. 4,232 sanctioned in G.O., No. 120 W., of 1888-89.

9. The manufacture is for general purposes and will continue for ever; but with reference to the estimate in question, it is intended to give it a duration of 8 years.

10. On an average about 500 units of stone and 100 of concrete will be manufactured annually, valued at Rs. 3,500, in addition to about two to three thousand rupees of cut-stone for 8 years.

11. There are at present at site—

|                                         |     |     |     |     |     |       |
|-----------------------------------------|-----|-----|-----|-----|-----|-------|
| Five sets of points and switches, value | ... | ... | ... | ... | ... | RS.   |
| Iron rails                              | ... | ... | ... | ... | ... | 785   |
|                                         |     |     |     |     |     | 1,092 |

besides rails laid on the existing line, 9,100 feet in length.

12. The outlay up to end of September 1889 is Rs. 6,383 and the amount adjusted Rs. 1,122. If the revised estimate of Rs. 11,500 is sanctioned, Rs. 10,378 will have to be worked out, and this will be done in 8 years.

13. This letter disposes also of the references contained in your Nos. 863 N.L., 1st February 1889, and 590 N.L., 5th October 1889.

No. 878 N.L.

Submitted to the Chief Engineer, Public Works Department, together with the revised estimate, and a statement showing the particulars of the land and kiln account prepared in the manner referred to by the Examiner in para. 5 of his note embodied in G.O., No. 1733 W., dated 1st July 1889, for approval and sanction of Government.

BEZVADA,  
15th January 1890.

(Signed) J. HANNAN,  
Superintending Engineer, II Circle.

Office note from the Examiner, Public Works Accounts, dated Madras, 3rd March 1890, No. 1114.

Forwarded with the following remarks.

2. *Land and Kilns account of the Brick manufacture, Nellore.*—The assets should be disposed of to best advantage and rates raised as proposed for all buildings still under construction with bricks, &c., supplied from this manufacture. If any balance afterwards remains it must be written off.

3. *Land and Kilns account of the Stone manufacture, Pennér Anicut.*—The estimate may be sanctioned subject to the condition that a sum of Rs. 1,297/12 (or Rs. 108) should be credited to it monthly by debit to the manufacture accounts concerned in order to clear the balance of Rs. 10,378 in 8 years as proposed.

ORDER—dated 14th March 1890, No. 835 W., Public Works.

The continuance of the land and kilns account of the stone manufacture at the Pennér anicut, Nellore, is approved, and the estimate of Rs. 11,500 is sanctioned, subject to the condition that a sum of Rs. 108 should be credited to it monthly by debit to the manufacture accounts concerned.

2. With regard to the land and kiln account of the brick manufacture at Nellore, the assets should be disposed of to the best advantage, and any balance that may afterwards remain should be written off.

3. The sanction accorded in para. 1 of these Proceedings has been registered as Provincial No. 127 W. of 1889-90, and classified as "Stock."

MARCH.

Land and Kiln Accounts, Nellore  
Division

Passing orders on the — and sanctioning  
estimate of Rs. 11,500 for stone manufac-  
ture at the Pennér anicut.

Vol. 2218  
Vol. 82/2  
It will be observed  
that the draft on  
the accompanying  
current differs from  
what from the  
suggestions made by  
the Engineer in his  
office. Vol. No. 1114.  
2132 dated 1890.  
The Engineer's opinion  
with regard to the  
land and kiln account  
of the stone manufac-  
ture at the Pennér anicut  
has been accepted  
and it is decided in favor  
of the draft, but his  
suggestions in connection  
with the brick manufac-  
ture at the same place  
has not been adopted  
as it does not seem  
fair to raise the rates  
of the bricks, and  
thereby the cost of the  
building on which they  
may be used, when  
the balance can as  
well be written off.  
I should the Engineer's  
proposal be acted  
upon, and the bricks  
used in the construction  
of a residence for a  
Government official,  
not

Even if the  
birds do may not be  
used on a dwelling  
house, it does not  
seem fair to charge  
the cost of any  
building for the  
use of campfire places  
of General. The  
land and kitchen  
accounts to be in  
the same to go to  
whether the land  
is debited to <sup>the</sup> ~~the~~  
on which the birds  
are used, or written  
off in the account.

The Supt. Engineer  
N. Circle

To W.

Forwarded with the following  
remarks:-

2. Land and kilns account of the  
brick manufacture Nellore. The as-  
sets should be disposed of to best  
advantage and rates raised as propos-  
ed for all buildings still under con-  
struction with bricks etc. supplied  
from this manufacture. If any balance  
afterwards remains it must be writ-  
ten off.

3. Land and Kilns account of the  
stone manufacture Penner Anicut. The  
estimate may be sanctioned subject  
to the condition that a sum of Rs.  
1,297/12 ( or Rs.108 ) should be cre-  
dited to it monthly by debit to the  
manufacture accounts concerned in or-  
der to clear the balance of Rs.10,378  
in 8 years as proposed.
