1 Duplicate Abstract

Report by the Supdg Engineer on the estimate of Rs 4730 for extending the Vernacular record room in the Treasury office at Tanjore

This estimate has been prepared at the request of the Collector of Tanjore

The present record room is too small and unprovided with proper ventilation - white ants have found away through the floor and are likely to attack the records - the roof is leaky and requires repairs -

2. It is now proposed to extend the building 18 feet, on the eastern side, to open 3 windows on the north side and to have the necessary repairs carried out to the existing building -

3. Provision is also made in the estimate for roofing the front

verandah with bengal terrace.

As the existing timber is of jungle wood, eaten by white-ants and generally rotten new teak wood is substituted.

4. The sub soil is stiff whitish gravel - The foundation now allowed is 12 inches deeper and wider than those of the existing building -

5. The rates are fair and the estimate is submitted for the sanction of Government through the collector of Tanjore vide para 988 of the P. W. Code -
