Note 19

As my movements depend entirely on those of Colonel Pennycuick and as the time is approaching for the departure of Government to the Hills, I am anxious to make in the event of having to accompany the Government the necessary arrangements for my stay up in the Hills.

No official communication has as yet been made to the effect been selected as the next Permanent Chief Engineer and Secretary to Government. I would suggest that a copy of the letter to the Government of India dated

27/9/19 Note 3/9/19

I am given to understand that it is the intention of Government to appoint me to the post of Chief Engr and Secretary to Government P.W.D and that they wish to know my opinion as to the time at which it would be convenient for me to take up this post, and as to the arrangements to be made for the control of the Project Works after my departure.

2 Concerning the first point, there is every reason to believe that the most difficult part of the foundations of the main dam, which I was particulary anxious to have put in under my personal supervision will be completed by the end of the present month, and all other portions of the work having been fairly started there is no absolute necessity for my presence after that time. I am anxious to draw up a report upon the subject

of

these foundations, and thus —
together with the Administration
report for the year and other matters
which should be attended to before
a transfer of charge is made, will
occupy another month, so that I could
hardly give over charge before the
end of April.

3 I should however greatly prefer
to remain in charge of the Project till
the latter end of July in order to see
next seasons work fairly started,
and I hope that Government will
allow me to do this. The classified
list shows that Colonel Hasted attains
the age of 55 on the 25 July, and + 24
presumably vacates the appointment
of Chief Engineer permanently on
that date. This would therefore be a
convenient date for the change as it
would save the necessity for a fresh
temporary appointment.

4. With regard to the future manage-
ment of the works, it is a question for
consideration whether a Superintending
Engineer

4/9/19
Engineer should be posted in my
or whether the Executive Engineers in
charge of the two Divisions should work
under my immediate control as
Chief Engineer. 4/9/19

5. I was at first disposed to prefer
the latter course and as regards the
I Division I do not consider that
there would be any objection to it;
Mr Taylor is thoroughly competent to
exercise the powers of a Superintendent
of Works, and possesses an acquaintance
with the details of the work which
would make the absence of a —
Superintending Engineer a matter
of no great consequence.

6. I am not however so sure about the
II Division, and on the whole I think
the balance of argument is in favour
of having a Superintending Engineer

7 I think however that it would be
desirable to make Kodaikanal rather
than the Periyar his head quarters, as
it will be desirable for him to devote
a larger portion of his time to the
Division than has been the case hitherto,

and

Kodaikanal (or rather Periyakulam which is close by) is just midway between the two divisions whereas the Periyar camp is at the extreme end of the works, and it is a tumblesome journey from there to the eastern portion of the II Division, especially now that the work of the latter is extending eastward.

8 The Government would doubtless wish, as I should wish myself, that I should retain a general control over the works as Chief Engineer, and the best arrangement would probably be for all matters ordinarily submitted to the Chief Engineer for Irrigation to be submitted to me, only such cases as required the orders of Government being (for the sake of uniformity) transferred for disposal in the Irrigation Branch, and returns and other papers necessary for completing the records of the Irrigation Branch being transferred to the latter for disposal or record. Details could be arranged without difficulty between Mr Walch and myself

I am glad that Col. Pennycuick has come round to the opinion that a Sup.t Engineer should be app.d in charge of the Periyar works when he (Col P.) leaves them; as I have always held that opinion myself. No more however need be said on the Question now. The arrangements w.h Col. P. proposes to enable him to retain direction of the work as Chief Engineer seem to me suitable and with I think be acceptable to Mr Walsh. There is time enough to settle the [illegible] of the S.E.

I know not much to urge against Col P's proposal to defer his joining the Lt. till the 25 July and I give in to his wishes. I think he might be informed that Govt assent to his proposals in the matter.
