From
Colonel J Pennycuick R.E.
Chief Engineer Penjar Project

To
The Chief Engineer
I.W. Department.

Sir,

I have the honor to request the sanction of Government to the local purchase of the articles named in the enclosed list.

2 It has been found by experience exceedingly difficult and troublesome to get an engine into position to drive the Centrifugal pump for pumping out the pits of the main dam, and next season it will probably be even difficult still.

2 The pulsometer is a far more convenient machine for the purpose, and

4/1113

and for the sake of lightness and convenience of handling I prefer this small pulsometer to one larger one.

3. The hand pumps are constantly wanted for clearing out small spaces where there is not room for baling and we have been much hampered for want of them.

4 I particularly wish to have these things ready for the beginning of next seasons work and there will not be time to obtain them from England.

5 It may be taken for granted they will not be obtainable from the P.W. Stores.

6 The prices have been taken from the price lists of respectable firms in England and India and it will be seen that there is no saving but rather the reverse by ordering the articles direct from England.

I have the honor to be,
Sir,
Your most obdt servt
[illegible] Lt Col R.E.
