Despatch from Secretary of State, No. 7, dated 2nd January 1890, para. 3.

Observations.—Several alterations have been made in recent years in the rules for calculating the estimated cost of stores purchased locally, as compared with that of similar articles if obtained from England. With a view to simplifying procedure in this respect, it is necessary to consolidate in one set of rules these corrections or additions for the guidance of army departments generally.

Resolution.—The Government of India direct that the following rules shall, in supersession of all others, be adopted for calculating the "estimated cost, if obtained from England," of English stores purchased locally in India for military services, or of stores of local origin and manufacture substituted for stores usually imported through the Secretary of State for such services:—

I. In calculating the "estimated cost, if obtained from England," the English market prices of articles of the same description and quality will be ascertained, and to this will be added the usual percentages for insurance, freight, War Office charges (if any), cost of landing and carriage in India, and all other incidental charges ordinarily incurred when articles are actually obtained from England.

II. The English market price of articles will be ascertained from invoices of similar articles imported by Government during the year in which, or during the six months prior to the date on which, such articles were

purchased in India. If such invoices are not on record, then the rates published in recognised commercial prices-current lists, or other commercial publications, will be taken; and failing these, quotations may be obtained from local manufacturers and dealers, which will, as far as possible, be checked by the account officer's own knowledge. In the absence of any other means of ascertaining the cost price in England, the War Office Vocabulary rates will be taken.

III. When the articles in question are metals which are peculiarly subject to variation in price, or when an audit officer has reason to doubt the accuracy of prices in invoices, he will use his discretion in obtaining and adopting rates from prices-current or generally approved commercial newspapers.

IV. Heads of departments concerned will, in all cases, be consulted by audit officers as to the reliability or otherwise of quotations obtained from other sources than Government invoices, or the War Office Vocabulary, before such quotations are finally adopted; and when similar articles are used in another department, the account officer of that department will also be consulted.

V. The market rate of exchange prevailing on or about the time of actual purchase, or, in the case of a proposed purchase, that prevailing on the day on which the estimate is made, will be adopted in converting into rupees the aggregate actual or estimated cost of the article before it is landed in India, as above arrived at.

The above rules will guide the preparation of the annual statement of expenditure on stores required by the Resolution of the Government of India in the Financial Department, No. 185, dated 10th January 1883. They will not apply in the case of malt-liquor, in regard to which special rules have been separately laid down.

Order.—Ordered that a copy of this Resolution be forwarded to the Department of Finance and Commerce; to the Secretary to the Government of Madras, Military Department, for the information of His Excellency the Governor in Council and for guidance; to the Secretary to the Government of Bombay, Military Department, for the information of His Excellency the Governor in Council and for guidance; to the Controllers of Military Accounts, Eastern and Western Circles, Bengal, and Examiner of Marine Accounts, for information and guidance; and to the Director-General of Ordnance in India, the Commissary-General-in-Chief, the Director of the Indian Marine, the Surgeon-General with the Government of India, and the Accountant-General, Military Department, for information.
