13TH NOVEMBER 1890, No. 3024 W., PUBLIC WORKS.

3024
1

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following paper:—

MEMORANDUM.

The undersigned has the honor to invite consideration of the arrangements to be made for the superintendence of the Periyár project.

2. In his note recorded with G.O., No. 919 W., of 21st March 1890, Colonel Pennycuick recommended, though with some hesitation, that the employment of a special Superintending Engineer for the control of the Project works should be continued for the present, and this arrangement was approved in the Government Order quoted.

3. The undersigned considers that the time has now come when the employment of this special officer may be discontinued, and it is suggested that advantage should be taken of the approaching retirement of Colonel Burton to post Major Campbell (now in charge of the Periyár works) to the V Circle in Colonel Burton's place.

4. The inspection of the works recently made by the undersigned has satisfied him that the necessity for a special Superintending Engineer no longer exists, and this view is shared by Major Campbell himself, who has more than once expressed his opinion that his presence in charge of the works is unnecessary.

5. The undersigned would propose to place No. II division, which includes all the work in the Madura district, under the Superintending Engineer, VI Circle, whose charge already embraces the district named; for the works in No. I division, *i.e.*, for those in the Periyár valley, he would propose to give Mr. Taylor (the Executive Engineer) the powers of a Superintendent of Works, and place him under the immediate orders of the Chief Engineer.

6. Mr. Taylor is an officer of over fifteen years' service, of judgment and ability above the average, and has been in executive charge of No. I division since the beginning of the work, so that he possesses an intimate knowledge of every detail connected with them, and the undersigned has full confidence in his capacity.

7. The separation of the two divisions as regards direction may appear unusual, but in point of fact they have nothing in common, being separated from one another by an interval of more than seventy miles, while the distribution of allotments between them must in any case be retained in the hands of Government and the Chief Engineer.

8. If these proposals be approved it will be necessary to combine with them a slight alteration in the distribution of divisions between the three southern circles. The VI Circle is already the most troublesome in the Presidency and the addition to it of the works belonging to No. II Periyár division would make it too heavy a charge for efficient supervision; on the other hand, the IV Circle, consisting of only two divisions (Coimbatore and West Coast), though large as regards area, is ridiculously light as regards work and an addition to it would have been proposed some time ago had it not been considered better to defer dealing with the question until it could be taken up at the same time as that of the supervision of the Periyár works.

9. It is proposed that the *North Arcot* division shall be transferred from the V Circle to the IV, which will then consist of the three divisions of North Arcot, Coimbatore and West Coast, and that the Negapatam and Tanjore divisions (which

together make up the Tanjore district) be transferred from the VI to the V Circle, relieving the former to an extent which will allow of the addition to it of No. II Periyár division.

10. The geographical arrangement will be convenient, the IV Circle including the districts served by the South-West line of the Madras Railway, the V Circle the three districts (Chingleput, South Arcot and Tanjore) served by the northern portion of the South Indian Railway and the VI the three districts (Trichinopoly, Madura and Tinnevelly) served by the southern portion of the same line.

11. It will be an incidental advantage to bring both banks of the Coleroon (South Arcot and Tanjore) under the same management.

12. If these proposals be approved the necessary subsidiary instructions will be issued by the Chief Engineer.

13. The proposed arrangements will add considerably to Mr. Taylor's responsibility, and it is therefore recommended that application be made to the Government of India for sanction to the grant to him of an allowance of Rs. 100 as Superintendent of Works under para. 240 of the Public Works Code; there will of course be a large saving by the abolition of the extra Superintending Engineer's post.

(Signed) J. PENNYCUICK, Colonel, R.E.,
Chief Engineer, P.W.D.
23rd October 1890.

Order—dated 13th November 1890, No. 3024 W., Public Works.

The proposals of the Chief Engineer are approved.

2. The Superintending Engineers concerned will make immediate arrangements for the transfer of the North Arcot division from the V to the IV Circle and of the Tanjore and Negapatam divisions from the VI to the V Circle.

3. These transfers should be completed in time to allow Major Campbell to go completely through the works of No. II Periyár division in company with the Superintending Engineer, VI Circle, and to hand over charge of this division prior to relieving Colonel Burton in the charge of the V Circle.

4. The Superintending Engineer, Periyár project, will report, after consultation with the Executive Engineer, No. I Periyár division, what portion of his present office and petty establishment he considers should be retained for employment under the Superintendent of Works. Notice should be given to those members of his establishment whose services it is not desired to retain.

5. The Government of India will be addressed regarding the grant of a local allowance as Superintendent of Works to the Executive Engineer in charge No. I Periyár division.

(Here enter No. 3025 W., dated 13th November 1890.)

~~READ the following:~~

I shall not give my assent to this proposal until I have had an opportunity of seeing and speaking to Colonel Campbell. He had better be sent for.
C.
Better 29th.

~~FOR ORDERS.~~

This is rather a Council discussion & it [illegible] [illegible] the report [illegible] [illegible] Colonel Campbell
C. Nov 4/90

These arrangements seem all to be good if the Periyar Project now needs no Superintending Engineer. I suppose Col. Pennycuick is sure of this? Mr Grigg who has just been to the place informs me that the hills between which the main dam is being built are formed of boulders instead of solid rock as was supposed, & that the line of the dam will have to be altered & the cost vastly increased. I know too little about the Project to say whether there is anything in this or not.

JG
28/10

The undersigned has the honor to invite consideration of the arrangements to be made for the superintendence of the Periyar Project.

2. In his note recorded with G.O. No. 919 W of 21 March 1890, Col. Pennycuick recommended, though with some hesitation, that the employment of a special Superintending Engineer for the control of the Project works should

should be continued for the present, and this arrangement was approved in the G.O. quoted.

3. The undersigned considers that the time has now come when the employment of this special Officer may be discontinued, and it is suggested that advantage should be taken of the approaching retirement of Col. Burton to post Major Campbell (now in charge of the Periyar Works) to the V Circle in Col. Burton's place.

4. The inspection of the works recently made by the undersigned has satisfied him that the necessity for a special Superintending Engineer no

longer

3024/4

longer exists, and this view is shared by Major Campbell himself, who has more than once expressed his opinion that his presence in charge of the works is unnecessary.

5. The undersigned would propose to place No. II Division, which includes all the work in the Madura District, under the Supt'g. Engineer, VI Circle, whose charge already embraces the district named; for the works in No. I Division i.e. for those in the Periyar valley he would propose to give Mr. Taylor (the Executive Engineer) the powers of a Superintendent of works, and place him under the immediate orders of the Chief Engineer.

He

6. Mr Taylor is an Officer of over fifteen years service, of judgment and ability above the average, and has been in executive Charge of No I Division since the beginning of the work, so that he possesses an intimate knowledge of every detail connected with them, and the undersigned has full confidence in his capacity.

7. The separation of the two divisions as regards direction may appear unusual, but in point of fact they have nothing in common, being separated from one another by an interval of more than seventy miles, while the distribution of allotments between them must in any case be retained in the hands of Govt. and the Chief Engineer.

7. If these proposals be approved it will be necessary to combine with them a slight alteration in the distribution of Divisions between the three Southern Circles. The VI Circle is already the most troublesome in the Presidency and the addition to it of the works belonging to No II Periyar Division would make it too heavy a charge for efficient supervision; on the other hand, the IV Circle consisting of only two Divisions (Coimbatore and West Coast) though large as regards area, is ridiculously light as regards

regards work and an addition to it would have been proposed some time ago had it not been considered better to defer dealing with the question until it could be taken up at the same time as that of the supervision of the Periyar Works.

8. It is proposed that the North Arcot Division shall be transferred from the V Circle to the IV, which will then consist of the three Divisions of North Arcot, Coimbatore and West Coast, and that the Negapatam and Tanjore Divisions (which together make up the Tanjore District) be transferred from the VI to the V Circle, relieving the former to an extent which will allow of the addition to it of No. II Periyar Division.

The

Note for orders

3024/13

The undersigned has the honor to invite consideration of the arrangements made for the superintendence of the Periyar Project -

In his note recorded with, ~~and approved in~~ G.O. No -- of --- Col. Pennycuick recommended, though with some hesitation, that the employment of a special Superintending Engineer for the control of the Project works should be continued for the present, and this arrangement was approved in the G.O. quoted -

The undersigned considers that the time has now come when the employment of this special officer may be discontinued, and it is sug=

-pected that advantage should be taken of the approaching return of Col. Rhetin to post Major Campbell (now in charge of the Punjab Works) to the V Circle in Col. Rhetin's place -

The inspection of the works recently made by the undersigned has satisfied him that the necessity for a special Superintending Engineer no longer exists, and this ~~opinion~~ view is supported by Major Campbell himself, who has more than once expressed his opinion that his presence in charge of the works is unnecessary -

The undersigned would propose to place No II Division, which includes

and the undersigned full confidence in his ~~fully~~ capacity -

The separation of the two Divisions as regards direction may appear unusual, but inasmuch as they have nothing in common, being separated from one another by an interval of ~~nearly~~ more than seventy miles, whilst the distribution of other works has been then made - any case be retained in the hands of Government or the Chief Engineer -

If these proposals be approved it will be necessary to combine with them a slight alteration in the distribution of Divisions between the three Northern Circles - The II Circle is already the most troublesome in the Punjab and the addition to it of

the works belonging to the II Punjab Division would render it too heavy a charge for efficient supervision; on the other hand, the IV Circle consisting of only two Divisions (Contributor and Rohtak Canal) though large as each one, is ridiculously light as regards works and ~~its maintenance in its present condition would only justifiable~~ an addition to it would have been proposed some time ago had it not been considered better to defer dealing with the question until it could be taken up at the same time as that of the supervision of the Punjab works -

It is proposed that the North Central Division shall be transferred from the V Circle to the IV, which will then consist of the three Divisions of North Arcot, Coimbatore and West Coast, and that the [illegible] and Tanjore Divisions (which together make up the Periyar District) be transferred from the VI to the V Circle, relieving the former to an extent which will allow of the addition to it of No II Periyar Division—

The proposed arrangement will be conveniently the IV Circle including

of the works in the Madura District, under the Superintending Engineer Circle, whose charge embraces the district named; for the works No I Division, i.e. for those in the Periyar Valley we would propose to give Mr Taylor (the Executive Engineer) the powers of a Superintendent of Works, and place him under the immediate orders of the Chief Engineer—

Mr Taylor is an officer of over fifteen years service, of judgment and ability above the average, and has been in executive charge of ~~the~~ the No I Division since the beginning of the work, so that he possesses an intimate knowledge of every detail connected with them,

the Districts north of the S. W. line of the Madras Railway; the V Circle the three ~~[illegible]~~ Districts (Chingleput South Arcot and Tanjore) north of the northern section of the S. I. Railway and the VI the three Districts (Trichinopoly Madura and Tinnevelly) south of the southern section of the same line—

It will be an incidental advantage to bring both banks of the Coleroon (South Arcot and Tanjore) under the same management—

If these proposals be approved the necessary notifications will be issued by the Chief Engineer—

C.A.W.

If not too late
I want the following
added to the G.O.
on the transfer of
Major Campbell to the
V Circle —

3024/16

"The Superintending Engineer
Punjab Project will
report after consultation
with the Executive
Engineer No I Punjab
Division what portion
of his present office
and field establishment he con-
siders should be re-
tained for employment
under the Superintendent
of Works — Notice should
be given to those members
of this establishment
whose services it is
not desired to retain" —

If too late to insert
this in the G.O., it
can be issued subse-
quently as a E. [illegible]
