READ—the following papers:—

From H. W. FOSTER, Esq., Officiating Registrar of the High Court of Judicature, Appellate Side, to the Chief Secretary to Government, dated Madras, 25th November 1890, No. 2686.

I am directed to forward, for the sanction of Government, the accompanying plans, with estimates, amounting to Rs. 6,290, for repairs and improvements of the District Munsif's Court at Srivaikuntham in the Tinnevely district.

2. The present court-house, which was built in 1875, is reported not to afford sufficient accommodation.

Approved and transferred to the Public Works Department.
(By Order.)

16th December 1890.

(Signed) A. BUTTERWORTH,
Acting Under-Secretary.

Note by the Chief Engineer, Public Works Department.

The estimate is submitted to Government for sanction with the remark that the copper tape for the lightning conductors should be $1" \times \frac{1}{8}"$ and the earth-plates $3' \times 3' \times \frac{1}{8}"$. The use of platinum tips is unnecessary, and it would be better to finish off the conductors with three or four copper points projecting upwards from a ring fixed about a foot below the tip of the lightning rod. The pattern can be obtained from the Public Works Workshops.
