REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 26th March 1891, No. 174 :—

MR. CLOGSTOUN.

Read—the following letter from C. D. MACLEANE, Esq., Collector of Nellore, to the Secretary to the Commissioner of Revenue Settlement, Land Records and Agriculture, dated Nellore, 21st March 1891, No. 1492-Tour :—

I have the honor to reply to Board's Proceedings, No. 100, dated 24th February 1891.

2. Work No. 1 at Dugarápatnam will afford relief to people out of work in the months of May and June in the eastern non-deltaic villages of Gúdúr taluk, and I would advocate its being put in hand in the early part of the ensuing official year.

3. Works Nos. 2 and 3 are near delta villages and are scarcely necessary for the above purpose.

4. None of the people of Rápúr taluk and Venkatagiri division would be likely to take advantage of the above-named works. They are at a distance varying from 20 to 10 miles from the villages in the northern parts of Pólúr division.

5. Work No. 4 at Irakam lies near the affected parts of Pólúr division from Sulurpett up to Ramapuram, but the interference of the lake whose width and depth render it unfordable is likely to prevent intending coolies from leaving their present work at Tada salt-pans and shell-pits in villages between the trunk road and the lake. The work is a very useful one and I should be glad to see it put in hand at once, but from what I have already seen of the habits of the people, and from what is reported by the Deputy Collector whose head-quarters are at Náyudupet, I am unable to say in the terms of the reference that it is likely to attract many laborers from Pólúr and Venkatagiri. The poorer classes naturally prefer to take work in their own villages or villages at any rate whose distance enables them to go back at night to their houses.

Resolution—dated 26th March 1891, No. 174.

The Collector is requested to communicate with the Executive Engineer, Buckingham Canal, regarding the commencement of work No. 1 at Dugarápatnam and report the result at an early date. He will also report what works he will recommend for execution in the Rápúr taluk and the Venkatagiri and Pólúr divisions in the event of its being considered necessary to begin works in those tracts also. Mr. Macleane is requested to see that the affected villages are frequently inspected by the Divisional

officers and Tahsildars and Deputy Tahsildars. The condition of several villages of the Madarpak division of the Kálahasti zemindari is reported to be very unsatisfactory, and the Collector should satisfy himself that the distress has not extended into the villages of his district adjoining.
