2. The selection of students for the different circles and divisions named will be left to the Principal, College of Engineering, in communication with the General Superintendent, Public Works Workshops.

4. The names of the students selected should be communicated, without delay, to the Superintending Engineers concerned, who will at once issue such further instructions as may be necessary. The students must be prepared to join the work to which they are posted about the middle of January. The distribution of the students should also be reported to the Chief Engineer.

Copy of letter from the acting Principal, College of
Engineering Madras, ^{to the D.P.S.} dated 10th March 1891 P. 1430 C.

With reference to your endorsement
P. 2304 dated 5th March 1891, I have the honor to state
that I am of opinion that the limit of age in the
case of students entering this College may be advantageously
abolished. Students over age, however, should not be
eligible for any awards or scholarships appertaining to
the College, nor should they be eligible for Government
service. In this opinion, both Mr. Chatterton and
Mr. Middlemast concur. I enclose copies of their memos
on the subject.

2. I think that each case of a man
over age applying for admission to the College should be
dealt with on its merits and that the decision should be
left with the Principal. There may be circumstances which
would necessitate the rejection of such a candidate. In
other respects the rules of admission may be the same as
for ordinary students. If, however, the numbers of candidates
eligible under the present rules reach the numbers fixed
under paragraph (1) article 4 of the rules relating to
the constitution of the College of Engineering, it will be
necessary to reject the overage candidates, as the accommo-
dation available will, in that case, be insufficient.

Endorsement of the Director of Public Instruction

ation of the acting Principal.
