Executive Eng. Office
West Coast Division
Calcutta 27th May 1891

1624
A. J. J. Eng.
Executive Engineer
West Coast Div.

The Superintending Engineer
4th Circle, Combarua

I have the honor to invite
your attention to the following
circumstances. The work of this
Division consists almost entirely
of Civil Buildings, Military Build-
ings and Imperial Roads. There is
continual and incessant work
for draftsmen in this Division
if work is to be efficiently and
economically carried on. There are
at present in the whole of this Di-
vision three draftsmen in all.
One of these is attached to the Hy-
draulic Sub Division and a consoli-
dated pay of 75. I do not think it

is necessary for me to recapitulate the be-fogged and unsatisfactory state in which designing and estimating for the Varjiti-Gudalur Road - the real work in that sub-division - has got and from which Mr. Allen's gallant exertions are gradually extricating it. You must have both seen and heard about that matter ad nauseam suffices it, I think, to write that that draftsman is fully occupied - attached to the Divisional office in addition there are a Head draftsman with pay of Rs 50 a month rising up to 70 - and a second draftsman - a temporary man on Rs 35 rising up to 50 a month.

2. I would with your permission, I trust desire you strongly to endeavour to procure sanction for a third draftsman on Rs 35 a month rising by increments to 50 a month. I am firmly convinced that I could find ample work

Permanent.

and Government would gain financially by the employment of him. 3. Work is continually in arrears more especially with regard to military building work which if I simply had a sufficiency of draftsmen I could get through with most satisfactorily.

1684/8
4. I am quite aware that during the last year this state of arrears has been due to a question which is now partially rectified, until very lately there was only one Draftsman - the Head Draftsman, alby no means energetic man attached to the Divisional office. The main question seems to be also not only intellectually but physically weak. The second draftsman had been taken away from this Division and attached to No. 1 Periyar Division. My remonstrances failed to get him either sent back to his proper Division or permanently attached to No. 1 Periyar - and only after a deal of trouble was I permitted

mitted and able to get a temporary draftsman in his place. The office is consequently now if not actually catching up arrears of work at any rate not falling into increase of arrears. But I would venture to point out that any accident may even destroy this semi-satisfactory state of things, a draftsman being ill or any small increase of work. Moreover the drawings are not always sent from my office with that exactness of detail which I like to see in a Civil Engineering drawing - and for want of that exactness complications frequently arise. There have been as I think as you are aware some of these complications in the building of the new Collector's Residence.

5. Under these circumstances I would earnestly desire to invite your attention to the extreme advisability of getting this third draftsman sanctioned.

As.

6. As it usually takes me a couple of months at least to get a draftsman for the West Coast Division it would I think be well to obtain this sanction as early as possible.

7. I would wish to point out that continuously I believe from the reorganization of this Division up to March 1889 there were three draftsmen employed in the Divisional office.

8. Further I am of opinion that if this third draftsman were granted a large amount of purely clerical work would be saved.

I have &c. &c.

57 St. James

Executive Engineer

No 288 of 3-6-91

Encl. 1.

Copy forwarded to the Chief Engineer P.W. Department with a request that he will be good enough to obtain the sanction of Government to the employment

a temporary Draftsman on \$35
per month for which a propo-
sition statement is enclosed.
