READ—the following paper :—

From R. B. FOOTE, Esq., Superintendent, Geological Survey of India, to the
Joint Secretary to Government, Public Works Department, dated Yercaud,
13th June 1891, No. 1686.

In reply to your letter of the 27th ultimo, No. 1452 W., just received, I have
the honour to inform you that, in my opinion, based on personal acquaintance with
the Trichinopoly Central jail and its environs, there is so little chance of reaching
water by further sinking through the hard granite gneiss, which there forms the
sub-rock, that it would be far better not to attempt it, but to resort to the collection
of surface water.

2. The two plans you enclosed are returned herewith.

ORDER—dated 20th June 1891, No. 1672 W., Public Works.

Communicated to the Superintending Engineer, VI Circle, and to the Judicial
Department with reference to G.O., No. 1451 W., dated 27th May 1891.

SIR,

In reply to your letter of the 2nd ult. No. 1457 W. just received I have the honor to inform that in my opinion, based on personal acquaintance with the Trichinopoly Central Jail and its environs, there is so little chance of reaching water by further sinking through the hard granite-gneiss, which there forms the sub-soil, that it would be far better not to attempt it, but to resort to the collection of surface water.

The two plans you enclosed, are returned herewith.

I have the honor to be
