Order—dated 14th March 1891, No. 197, Revenue.

Miscellaneous.

In its orders on the reports regarding the condition of the districts which have suffered from drought, the Government has impressed upon Collectors the necessity for at once preparing programmes of works for all the affected tracts, and has directed that selections should be made from the lists of irrigation works, both major and minor, in communication with the Public Works Department, and that estimates should be got ready for the works selected so that there may be no delay in starting them when necessary. The Commissioner of Revenue Settlement, Land Records and Agriculture is requested to call upon the Collectors of the districts concerned to submit their programmes at once and to see that estimates for the works selected are got ready without delay.

2. Where the irrigation works available in any affected tract are insufficient to meet all the demand for employment likely to arise therein, they should be supplemented by a sufficient number of suitable Local Fund works.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 5th June 1891, No. 328 :—

MR. CLOGSTOUN.

Read—the following letter from W. J. H. LE FANU, Esq., Collector of North Arcot, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated 4th June 1891, No. 2687-Rev. Gl. :—

With reference to Board's Proceedings, Mis. No. 1331, dated 19th March 1891, I have the honour to forward, herewith, two lists of works—one for Minor Irrigation works and the other for Major works—that may serve as programme of works in Wandiwash taluk. The works for which estimates are ready have been noted in the remarks column. The lists will show that 43. Minor works and 34. Major works have been selected as relief works and that estimates have been got ready for 9. Minor works and 15. Major works. The estimates for the remaining works are also under preparation and will be got up with all possible expedition. The amount of the estimates now ready comes up to Rs. 20,540, capable of giving employment to 4,000 coolies for about 40 days. The remaining works for which estimates are under preparation are estimated to cost Rs. 40,000, capable of giving employment to 4,000 coolies for 80 days.

2. A third list showing the programme of works for the Kālahasti zemindari is also herewith submitted. Estimates are under preparation, except for works Nos. 2, 4 and 7, which, according to the decision arrived at at the conference, have been proposed to be commenced at once. The estimates for the remaining works will be got ready soon.

Resolution—dated 5th June 1891, No. 323.

Submitted for the information of Government with reference to G.O., dated 14th March 1891, No. 197.

2. The works proposed for the Wandiwash taluk appear to be sufficient for the relief of distress for the next two months at least, should relief works for this period be required. In the Kálahasti zemindari seven Local Fund roads are proposed, the aggregate cost of which is estimated at over Rs. 43,000. Estimates are ready for the three works noted on the margin, which the Collector states it was arranged at the meeting held at Rénigunta on the 7th May to commence at once.

	Cost.	
Road from Kopedu to Katur	Rs. 11,740	
Maderpák to Arumbakum	2,380	
Chinnammápet to Pennalur	680	

3. The Commissioner is unable to find in the map the village of Kopedu, but he believes it is not in the Ragigunta valley which the Commissioner selected as the third tract in which it was desirable that the Collector should undertake some road-work. The Ragigunta valley southward to the Nágálápúram-Arni road was selected because in that tract there were no irrigation works for which estimates were ready. The road which the Collector numbers 7 in his list of Kálahasti works is, the Commissioner believes, identical with the road from Pennalurpet to the Nágálápúram-Arni road which is one of those numbered 5 in the list. The Collector is requested to state if this is the case.

4. If from any cause it should be necessary, after the end of the current month, to give employment to any considerable number in the zemindari, the Commissioner is of opinion that any expenditure which has to be incurred from Provincial Funds should be restricted as much as possible to roads in which the zemindari is now greatly wanting. The expenditure on roads will be of general public advantage, while that on irrigation works is practically expenditure in relief of the Zemindar whose duty it is to keep the works in repair. The Commissioner requests the sanction of Government to the course proposed and requests also that Mr. Watson may be allowed to remain in the zemindari in charge of road-work, and of any other works, tanks or others which it may be necessary to carry on in parts where distress may exist, but in the neighbourhood of which, say roughly within 15 miles of which, no road-work can be advantageously started. This recommendation would have been made at an earlier date had it not seemed advisable that all repairs to zemindari tanks begun should be carried to completion and had it not been that the Collector in his capacity of President of the Local Fund Board agreed to make an early commencement of road-work which would have provided employment over a considerable area of the taluk. The Collector has, however, not yet found it possible, it is believed, to commence work on any road, one road on which it was anticipated that work would have been started some weeks since having been found—at Rs. 300 a mile—too expensive to justify its being taken up.

5. The Collector will be requested to select from his lists those roads which are most needed in the zemindari, and which at the same time are most fitted, from their situation, to give employment to the distressed.

6. The estimates for these selected works, if not yet ready, should be prepared at the earliest possible date.

Miscellaneous.

Recorded.

2. The Government agrees with the Commissioner in thinking the expenditure from Provincial funds on relief works in the zemindari should be restricted as much as possible to road works. The question of the retention of Mr. Watson's services will be decided on receipt of the report called for in G.O., dated 11th instant, No. 3447.
