Account.

READ—the following papers:—

From L. L. WICKHAM, Esq., Acting General Superintendent, Public Works Stores, to the Superintending Engineer, V Circle, dated Madras, 23rd February 1891, No. 1716 S.

I have the honor to forward, for submission to Government, the annual indent (in triplicate) for the Public Works stores required from England for the coming official year 1891-92.

2. The total value of the articles indented for amounted to about £6,426, excluding freight payable in England, against the estimated amount of £5,516 as per my letter No. 567 S. of 17th July 1890.

3. The excess of £910 is due to the value of copper tape and plates which were not foreseen when the estimate was submitted.

4. The continuous copper tape is required for lightning conductors to avoid the risk of bad joints caused by cutting a copper sheet into strips and revetting them to form one long tape. The indent includes materials required for manufacturing the jobs in the Public Works Workshops.

Sir,

With reference to the following demands in the indent for stores
for the Madras Public Works Department No. 18 dated 14th March 1891,
forwarded with your letter No. 744 W of the same date, viz:—

Item		
431	Screw plate 4in. long estimated cost £1	No. 1
432	3in. long estimated cost 10s	1

I may observe that judging from the estimated prices quoted in the indent,
special screw plates are required, and the sizes asked for are those
generally used for very fine work, such as that of jewellers or
electrical mechanics.

As, however, there is some doubt in the matter I shall be
obliged if you will cause me to be furnished with particulars as to the
sizes of holes in each plate, and any further details that may be
necessary to insure a correct supply.

I may add that it is proposed to send taps with the plates.

I have the honour to be, Sir,

Your obedient Servant,

J. Turker

The Secretary to the Government
of Madras,
Public Works Department,
Madras.

for Director General of Stores.
