No. 400 S. & E.

Office of Superintendent of Works

No. I Perijar Division

Station Perijar 16th January 1891-

From

M. S. Taylor Esquire

Superintendent of Works

No. I Perijar Division

To

The Chief Engineer

P. W. Department.

Sir,

With reference to G. O. No. 3360 W
dated 17th December 90, regarding English
Portland cement I have the honor
to observe that as we are not likely
after this season to have many
situations in which work will have to
be laid under water, a large supply
of English cement will not be required.
The Madras cement does very well for
ordinary situations and pointing, and this
being granted, we may not require 600
barrels of English cement during the whole
of

of next season - It is not advisable
to keep a large store of cement in this
climate, so that I think as we cannot
order a large consignment out from
home it will be less expensive and
certainly more convenient to purchase
the comparatively small quantities,
as required, in this country.

I have the honor to be

Sir

your most obedient servant

H. Dyer

Superintendent of Works

No. 1 Perijar Division.
