15TH JULY 1891, No. 1954 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following paper :—

From H. S. TAYLOR, Esq., Superintendent of Works, No. I Periyár division,
to the Chief Engineer, Public Works Department, dated Periyár, 3rd July
1891, No. 61 C.E.

I have the honour to bring to your notice that some system of communication is absolutely necessary between the terminals and the driving stations of the wire tramway in order that the machinery may be stopped in case of anything going wrong and serious accident thereby averted.

2. The simplest form of communication appeared to be to erect a line of wire on insulators fixed on the existing tramway posts with an electric bell at each station.

3. In this view I wrote to the Superintendent of Telegraphs, Madras division, to inquire the cost of the requisite wire, insulators, bells, and batteries.

4. In reply he informed me of the cost, on which I have prepared an estimate for Rs. 250 which is within my powers of sanction.

5. The Superintendent also informed me that he could not issue the stores without sanction of the Director-General and also that the sanction of the Government of India was necessary for the erection of a new line of telegraph or telephone.

6. I then applied for the permission of the Director-General for the issue of the stores and represented that putting up a wire and bells for signalling to the driver of the machinery of a wire tramway already in position could not possibly be termed either a telegraph or a telephone requiring the sanction of the Government of India. The Director-General takes the opposite view as will be seen from the copy of the letter enclosed.

7. I hardly think the circumstances can be plain to him as the line I wish to erect is simply of the same nature as the communication between house and stables of domestic arrangements. If, however, you consider it necessary, I request you will be good enough to obtain the sanction of the Government of India, as the communication with the driver of the turbine will be necessary as soon as the tramway begins working.

ENCLOSURE.

From A. HULLAH, Esq., Superintendent of Telegraphs, Madras division, to the Superintendent of Works, No. I Periyár division, dated Madras, 22nd June 1891, No. 1663.

With reference to your letter No. 107 M., dated the 15th of May 1891, I have the honour to inform you that the Director-General of Telegraphs has decided that the line you propose erecting is distinctly a "telegraph," as defined in the Act XIII of 1885, and, as such, cannot be erected by you without the sanction of the Government of India.
