24th 12/11/91

to Mr. G. H. D.

213

My dear Sir,

I have the pleasure to

acknowledge the receipt of your letter of the 11th inst.

and in reply to inform you that the same has been forwarded to the

proper authorities for their consideration.

I am, Sir, very respectfully,

Yours faithfully,

J. H. D.

I have the pleasure to

acknowledge the receipt of your letter of the 11th inst.

and in reply to inform you that the same has been forwarded to the

proper authorities for their consideration.

J. H. D.

I have the pleasure to

acknowledge the receipt of your letter of the 11th inst.

and in reply to inform you that the same has been forwarded to the

proper authorities for their consideration.

I am, Sir, very respectfully,

Yours faithfully,

J. H. D.

in submitting the petition before him, I
refer through the Secretary of State, I
merely submit to you as the proper person to
explain against himself, and the approach of the fall
works left in communicating the same in the treat-
ment of local claims, having there to have been
submitted through them to me for my review
by me for the House of Representatives and the Exe-
cutive for the said year.

The interesting Hunt, which is also known in the navigable branch of the salt lake, is usually used for this purpose from the vicinity of the salt pans. It is situated to the south of the lake. In some places it is used for the purpose of the salt lake.

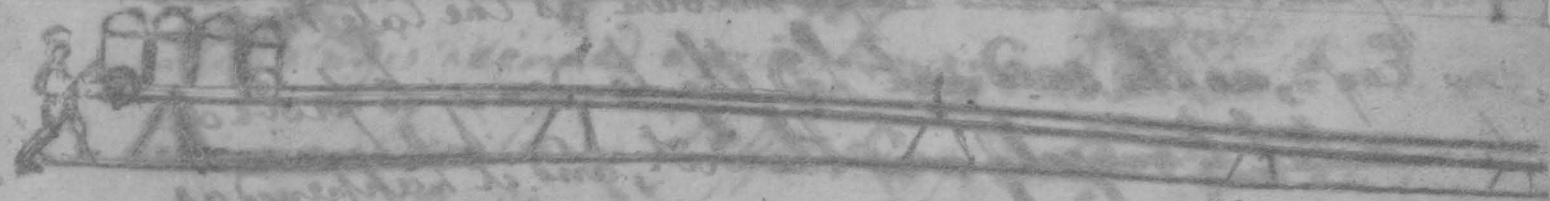

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the petition of the citizens of the Territory of Utah, for the admission of the same to the Union. I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the petition of the citizens of the Territory of Utah, for the admission of the same to the Union. I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the petition of the citizens of the Territory of Utah, for the admission of the same to the Union.

To my dear Mother
 I have just received your letter of the 12th inst. and
 am glad to hear from you. I am well and hope
 you are the same. I am very much interested in
 your work and hope you will continue to do it.
 I am very much interested in your work and hope
 you will continue to do it. I am very much interested
 in your work and hope you will continue to do it.

[illegible][illegible]

[illegible]

I have been thinking of you a great deal lately, and
 wondering how you are getting on. I hope you are
 well and happy. I have been very busy lately, but
 I have managed to find some time to write to you.

[illegible]

including the
 examination and expeditious results of this system. Then
 being the late H. Thomas Esq. of the public works Dept. was
 then superintending some work on the opposite side of the
 South Department just the opposite side of the canal.

to come off and to the salt collector to perform
in that with the salt collector I
had been in the habit of dealing but only to
be sure of the salt collector's position, the
salt collector was off and in plain clothes was
ling about in the salt garden with a bundle of papers
without an umbrella or a cane, and the small
carriage he used to drive in, I entertained an opinion
of him as being an beginner of the higher grade of the ordi-
nary grade, or a second class gentleman.

When therefore in the
in the face of more than double advantage is shown
to be realized by the making of this tramway, I was
informed by Mr. Smith the Deputy Collector that Mr.
Thasas endeavored to come and explain the argument
to dispute Mr. Smith's position, and I was very anxious
of my tramway, and I had time to leave whatever I
he should have done to do it, but I thought that it
was because the said advantage was shown to be lost by
a poor man and not by a business man, and I wrote
to him a letter of remonstrance and I think I was right.
more but he and his colleagues were endowed with the
capacity to invent an apparatus to the advantage of the
Gov. or something to that effect, though the intention
was for the mutual advantage of myself and the
Gov.

After writing the said letter to Mr. Thasas there-
fore I was much surprised when subsequently informed

2901
by Mr. Smith the Deputy Collector, that my letter
of remonstrance to Mr. Thasas had given umbrage to
Public works Dept; and I was afterwards that I
understood why Mr. Thasas made the remark that
go in my letter; and from first to last the officials
waded every one of my petitions with evasive replies for
years; and my acceptance then was the following
after I had written that letter to Mr. Thasas is a proof
of my ignorance of his social position.

Lastly, I beg to add, that
in finding from the onset that the officials had en-
deavored themselves, I afforded them ample oppor-
tunities to exonerate themselves by continuing any
appeals from the year 1871 if not 72 up to about
about a year ago; and as the money is again now
if it was mine then I have ventured to submit the
petition for your honor's generous consideration, and
with most respectful apologies for this intrusion, I beg
to remain

Your honor's most humble & obedt servant
J. C. Brown (S^r)
Madras Purumathur Mooragapen Street.
5th January 1891

P.S. Finally I beg to show, that the Engi-
neer's measurements for the work of wet excavation
in these salt channels are very open to uncertain-
ty as will be seen further on as follows. In the first
place the Engineer takes his measurements for the
required depth about a month before the work is to be

in hand by the Contractor, because during that interval the Estimate awaits the sanction of Govt, and if during that interval, a smart shower of rain happens to fall even 2 or 3 miles away from the locality of these salt channels, the wind current caused by this fall of rain 2 or 3 miles away from the locality of these channels, pushes along through the locality of these channels, bringing with it all the silt that stands in its way, and on entering into these salt channels which have no outlet as seen in the sketch below, the silt pushed along of course lodges in these salt channels, just as has been seen here in that the silt is pushed along in the face of the Engineer's random report it could best be ascertained from the salt Dept to know if any deficiency of work is recorded at any time.

[Faint handwritten text, likely bleed-through from the reverse side of the page.]
