Letter from the Supervisor, Madras,
to the Sub divisional Officer, Madras,
No 114 of 23rd June 1891. 2194

2194
I have the honor to report that
in carrying out certain works in
Shenkara Channel by departmental
agency. I find it difficult to send
in to you according to departmental
rules nominal Muster Rolls closed
generally for every 10 days for audit
before payment, thus making
coolies wait for their wages for a
long time. As neither you nor I
can be expected always to be near
this work or at head quarters, there
will certainly be a delay of 8 or 10
days after the date of closing the
Rolls - It is hard to expect the
coolies about Shenkara Channel
can afford, or will choose, to wait
for their wages, on account of the
proximity of Piriyar Works to this
Channel. I beg therefore, to request
sanction for paying N. M. Rolls
before audit -

11th

N. 411.

Submitted to the Executive Engineer.
It is quite impossible in this case
to carry out the work if the muster
rolls are to be pre-audited - I
have therefore in anticipation of
sanction told the Supervisor to
pay before audit.

Signed: C. S. Smith.

S. D. O.

30.6.91

N. 1414.

Submitted to the Deputy Engineer
as the Examiner in his report on
my office has found fault because a
few M. M. Rolls of very trifling
amount were paid before audit
by sub divisional officers - I do
not like to take it on myself to
permit the irregularity in the case
and yet the work cannot be done
if coolies are not paid promptly.
Contractors having failed the de-
partmental system was resorted
to as the only means of getting

the channel cleared quickly. as
the ryots want to begin cultivation
the channel cannot be kept closed
for long - -

J. S. S. 1891.

1891 Mr. Hughes
De Engineer

No 369 md 2/ 15 July 1891
5-16/-

Copy forwarded to the Chief
Engineer P. W. D. through the Examiner
P. W. Accounts.

2194/2

2 It is utterly impossible for the
sub divisional officer to remain
at the work or more or less
near it without neglecting other
work. So if payment must be
delayed until he receives, examines,
and returns the nominal muster
rolls to the subordinate in direct
charge of the work there must be
a delay of eight or ten days as
regards paying the coolies - On
the other hand the coolies are
very poor, and, therefore, it is
unreasonable to expect them to
work and remain ten days with-
out receiving their pay.

Moreover, as the rickas who

employ coolies pay, it is believed,
daily, delay in making pay-
ments increases very much the
difficulty - this department ex-
periences in getting laborers, par-
ticularly in the case of small
works, in remote places, for the
coolies naturally prefer working
for persons who pay them daily.

3. Under these circumstances the
undersigned considers the Executive
Superintendent should be authorized
to give permission to pay the coolies
before the sub divisional officer
examines the nominal muster
rolls when he considers it
desirable to adopt this course
in the interest of pushing on
an important or urgent work,
but of course he should see that
the rolls are sent, as soon
as possible, to the sub divisional
officer after payments have been

made for him to examine. 2194/3

4. The work in the present case
is clearing and improving an
important channel, irrigating
over 2000 acres. The ryots desire
that the work should be com-
pleted without delay as they
want to begin cultivation as
soon as possible, so it is cer-
tainly not advisable to delay
it in order to observe the Code

rule. Indeed it is con-
sidered that the Code rules
defect giving au-
thoritative business in-
vited coolies to be
nominal muster
rolls by the Divisional
officer whenever
desirable to adopt

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper :-

From the Sanitary Engineer to Government dated 3rd March
1891 No. 9/98

With reference to G.O. dated 15 November 1890.
3117 W.D. 11.90 No. 1705 M. Mis. Local and Municipal, I have the honor to
inform you that, on visiting Bellary, I find that since
the date of G.O. dated 7th March 1890 No. 145 W. Public
Works, the Superintending Engineer handed the scheme
over to the Military Works Department and I am in-
formed by the Chief Engineer, Military Works that no
work has been done on the scheme nor was any es-
tablishment entertained.

2. I have been over a portion of the ground
referred to by Mr. Russell in his letter embodied in
the last quoted G.O. and agree with him generally
in his views though I think that to secure a proper
supply certain modifications and additions will be
necessary.

3. I can however do little until I obtain an establishment as proposed by Mr. Russell and request therefore that the Rs. 1000 sanctioned in the G.O. quoted may be placed at my disposal.

4. It is not clear from any papers which I have whether or not Government desire me to prepare a comprehensive scheme which will improve the supply to the troops as well as the Civil population. At present both are practically dependent on the same sources of supply and it will be almost impossible to provide an improved supply for one class without interfering with the existing supply of the other.

5. The transfer of the scheme to me from the Military Works Department makes me however doubtful whether Government anticipated that the above would be the case and in any case the Military Works Department will have to be consulted as existing sources of supply are in charge of that Department.

6. I therefore ask for definite orders on the matter and request that Government will be pleased to make the necessary provision of funds to

to allow of the scheme being worked out in detail.

From the Quarter-Master General to the Secretary to Government, Military Department dated 4th July 1891 No. 1789 B.

2194/5

In returning Reference Order No. 1655 of the 18th March 1891, I am desired to forward, for the information of Government, the accompanying copy of a letter* from the Government of India to the Secretary to the Government of Madras P. W. D. received from the Chief Engineer, Madras Command Military Works and with reference thereto to request that definite instructions may be given to the Sanitary Engineer to Government to prepare a comprehensive scheme of water supply for both the troops and Civil population of Bellary and that the requisite funds for carrying out the preliminary survey may be placed at his disposal, leaving the distribution of cost to be settled hereafter.

Enclosure.

Copy of letter from the Government of India Military Department to the Secretary to the Government of Madras P. W. D. dated 19th June 1891 No. 1489 M. W.

With

Letter No. 1489 M. W.
dated 19th June 1891.

1837036.7.91

With reference to the proceedings of the Government of Madras, No. 3117 M. S. dated 22nd November 1890 and previous correspondence relative to the improvement of the water supply of Bellary, I am directed to state, for the information of His Excellency the Governor in Council, that as Bellary is likely to retain its military importance for many years, the Government of India consider that the troops stationed there should be provided with an adequate supply of good water, and I am accordingly to request, that under His Excellency's orders, the necessary project, which should be a comprehensive one, to include both the troops and a civil population, may be prepared by the Local Sanitary Engineer.

2. The question of the distribution of the cost including the cost of preparing the project, will be considered when the scheme has been prepared.

The endorsement of the Military Department dated 10th July 1891 No. 3847.

Transferred to the Local and Municipal Department and the referred papers returned.

2. It is requested that any orders that may be issued on the subject in question may be communicated

2194
icated to this Department for information.

From the Public Works Department dated 6th July 1891 No. 1837 W. Communicating letter from the Government of India, requesting that the necessary project for the water supply of Bellary should include both the troops and the civil population and be prepared by the Local Sanitary Engineer, to the Local and Municipal Department for issue of the necessary orders.

Order dated 3rd August 1891 No. 1213 M. S.

Communicated to the Sanitary Engineer and the Municipal Council, Bellary.

2. The Municipal Council is requested to place at the disposal of the Sanitary Engineer the sum of Rs. 1000 referred to in para 3 of his letter dated 3rd March 1891 No. 4/98. The question of distributing the cost will be considered hereafter and any excess payment now made by the Municipal Council will either be refunded or taken in abatement of its share.
