READ—the following paper :—

From J. W. MARTIN, Esq., Superintending Engineer, VI Circle, to the Chief Engineer, Public Works Department, dated Trichinopoly, 27th September 1891, No. 990 T.C.

With reference to your No. 451 D., dated 25th June 1891, and 866 D. of the 11th September 1891, calling for submission of the report and plans showing the exact nature of the arrangements proposed for the supply of water to the native troops at Trichinopoly, I have the honour to forward copy of letter No. 2293 of the 15th September 1891 from the Chairman, Municipal Council, Trichinopoly, to the address of the Executive Engineer. From this letter it will be seen that the plans and other documents connected with the complete project have not been received by the municipal authorities and that they are all with the Sanitary Engineer. The Executive Engineer is therefore awaiting the receipt of these plans, &c.

ENCLOSURE.

From the Chairman, Municipal Council, Trichinopoly, to the Executive Engineer, Trichinopoly, dated 15th September 1891, No. 2293.

With reference to your letter No. 409 M., dated 10th instant, I have the honour to inform you that the papers therein referred to have not been returned to me, and indeed they may never be. The plans are all lying with the Sanitary Engineer. I can give you if you want a printed copy of Mr. Oldham's report and scheme and the Sanitary Engineer's last letter to Government in which he suggests the reservoir on the rock may be done away with and direct pumping resorted to instead. These are the only papers now available with me of an engineering character; the rest bear upon the financial aspect of the question.

Forwarded to the Superintending Engineer, VI Circle, Trichinopoly, for perusal and favour of orders in continuation of this office No. 394 S.E., dated 10th instant.
