GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers :—

From H. IRWIN, Esq., C.I.E., Consulting Architect to the Government of Madras, to the Chief Engineer, Public Works Department, dated Chepâk, 10th July 1891, No. 1467.

With reference to G.O., No. 668 W., dated 3rd March 1890, I have the honour to submit revised design for a second-class taluk office and ryots' shed at Manantoddy with tiled roof with estimate and specification amounting to Rs. 26,660.

The pencil drawings were made in communication with the Superintending Engineer, IV Circle, and the Board of Revenue.

The enclosures received with the Government order under reply are herewith returned.

No. 553 D.

Forwarded to the Revenue Department for the approval of Government.

21st July 1891.

(Signed) J. PENNYCUICK, Colonel, R.E.,
Secretary to Govt., P.W.D.

G.O., dated 17th November 1891, No. 5927, Revenue.

Read—again G.O., dated 6th August 1891, No. 4349, Revenue.

Read—also the following Proceedings of the Board of Revenue (Land Revenue), dated 3rd September 1891, Mis. No. 6307 :—

Read—the following papers :—

Letter from H. IRWIN, Esq., C.I.E., Consulting Architect to the Government of Madras, dated 4th May 1891, No. 443.

Reference on the above, dated 3rd June 1891.

The Board notices that no room has been provided for the new stationary Sub-Magistrate, who is expected to be shortly appointed. The Consulting Architect will therefore be requested to add a court room and a retiring room for him. A small

property room, which might be as shown on the plan in pencil, is also needed as well as a small fire place in the corner of the treasury room, with chimney leading into that of the head accountant's and record rooms. Without this the shroff will be cold in the rains. The record room will be small, but the taluk is small one and it is noted that, as the room has windows along only one side, the available wall space will be proportionately greater than in the standard plan. The Board thinks it will do therefore as it is.

Endorsement of Government, Revenue Department, dated 6th August 1891, No. 4349, on that of Government, Public Works Department, dated 21st July 1891, No. 553 D., on letter from the Consulting Architect to the Government of Madras, dated 10th July 1891, No. 1467.

Reference on the above, dated 25th August 1891.

The Consulting Architect to Government is requested to forward to the Board's office copy of the Superintending Engineer's reply to his letter to that officer, dated 1st April 1891, No. 9, referred to in the communication addressed by him to the Board, dated 4th May 1891, No. 443.

Letter from the Consulting Architect to the Government of Madras, dated 26th August 1891, No. 2123.

Resolution—dated 3rd September 1891, Mis. No. 6307.

The revised design for the taluk office at Manantoddy received with the second letter read above will be re-transmitted to Government with the Board's entire concurrence in it.

2. Prior to the submission of the plan to Government, Mr. Irwin had sent it to the Board and the latter suggested certain further alterations which it is observed have been duly carried out on the present plan. The Board accordingly recommends that the plan and estimate, as now submitted, may be approved and sanctioned.

3. With reference to the second sentence of the Government endorsement the Board begs to state that from Mr. Irwin's communication to the Superintending Engineer and the latter's reply thereto (copies of which are herewith submitted to Government), it will be seen that the Collector has been duly consulted in the matter and that his wishes as regards the increased accommodation for the clerks of the office have been attended to.

Order—dated 17th November 1891, No. 5927, Revenue.

Approved and re-transferred to the Department of Public Works.

(True Extract.)

(Signed) C. A. GALTON,
Secretary to Government.

ORDER—dated 26th November 1891, No. 3164 W., Public Works.

The estimate, amounting to Rs. 26,660, for constructing a second-class taluk office at Manantoddy is sanctioned for early execution.

2. The current year's grant for the work is Rs. 5,000 and an additional allotment will be made if required.

3. This sanction has been registered as Provincial No. 92 W. of 1891–92 and classified as Civil Buildings, Original Works.

Copy of a communication from the *Executive Engineer West Coast Division, to the Supg: Engineer South Circle,* ~~to the Consulting Architect to Government,~~ No. *1296*, dated *23d April* 189/ .

With reference to your No. 181/206 of 12 April 1890, I have the honor to return the revised plans & Estimates for a new Taluq Cutchery at Manantody.

2. The Collector approves of the style of accommodation, position of doors & windows & other features in the design but suggests that more space should be allotted for the clerks as the provision in the design is insufficient.

3. The Superintendent of Police also approves of the accommodation provided for the Police but states that the Arm Rack is too small & suggests that one for nine carbines should be substituted and similar no of pegs for accoutrements also a few shelves should be placed in the wall for keeping records on.

4. The position the building should occupy has been marked on the site in consultation with the Local Revenue authorities

5. A copy of the Asst: Engineers Report of the result of trial pits is enclosed.

OFFICE OF THE CONSULTING ARCHITECT TO GOVT.,

Chepâk, _____ 18 .

3164/5

COPY of a communication from the Consulting Architect to Government to the

Superintending Engineer N Circle

No. *9*, dated *1st April* 1891.

With reference to G.O No 668 dated the 5th March 1890. I have the honor to forward the original plans and Estimates for the new Salary offices at Manantoddy with pencil drawings for alternative design for the main building & Ayah's shed drawn up in accordance with the proceedings of the Board of Revenue No 106 dated 4th Febry 91.

Be so good as to state in communication with the Collector of Malabar and Superintendent of Police if the plans are suitable and if the arrangement & position of the doors and windows are correct.

The roof covering I propose is corrugated galvanized iron sheeting

on the "I"x"I"x$\frac{1}{8}$ angle iron purlins are fixed and on this triangular tiles will be laid. The Barrack sheds for the Bombay Dufferin are similarly roofed by the Contractors, Messrs Richardson and Cruddas, and the arrangement is said to answer perfectly as the roof is absolutely watertight.

In returning the papers please mark the position the building should occupy on the site plan so that advantage may be taken of the most favourable aspect for those rooms it is desirable should not be exposed the full force of the winds and drifting rains.

As I have no knowledge of the nature of the soil the foundation depth have been assumed at that of the drawings which have been sent of the prior proposed plans.

I &c &c
Henry Irwin
Consulting Architect
