GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

Read—the following paper:—

G.O., dated 16th March 1891, No. 200. Revenue.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 6th March 1891, No. 118:—

MR. CLOSTOUN.

Read—again Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 4th February 1891, No. 56.

ABSTRACT.—Submitting to Government, with Board's remarks, special report from the Collector of Cuddapah on the state and prospects of the season in the district.

Read—also the following letter from E. J. SEWELL, Esq., Acting Collector of Cuddapah, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Cuddapah, 1st March 1891, Ref. on Current No. 196-Ver.:—

With reference to paragraph 9 of Board's Proceedings, No. 56, dated 4th February 1891, I have the honor to submit that the Chief Engineer, South Indian Railway, reports that there is a large amount of earth-work and ballast still to be done on the railway between Váyalpád and Mudégubba, i.e., nearly along the whole line and within the three taluks of Váyalpád, Madanapalle and Kadiri. This will find work for a large number of unskilled laborers.

2. The Sub-Collector, through whose division the railway runs, has been informed of this and requested to direct the Tahsildars of Váyalpád, Madanapalle and Kadiri to take active steps to publish in the villages of their taluks that labor is available on the railway line and to direct the heads of villages to inform the laboring classes of the same.

Resolution—dated 6th March 1891, No. 118.

Submitted, for the information of Government, with reference to the Proceedings quoted by the Collector.

(A true Copy and Extract.)

(Signed) P. RAJARATNA MUDALIAR,
Secretary.

Read—also the following letter from the Collector of Cuddapah, dated 9th March 1891, Ref. on Current No. 196-Ver.:—

With reference to G.O., No. 112, Revenue, dated 16th February 1891, para. 1, I have the honor to submit a copy of a letter from the Executive Engineer forwarding a list of works available or likely to be available for the employment of laborers.

2. From this list it will be seen that the department have but few sanctioned works on hand in the affected taluks. The amounts are a little over—

Rs. 5,000 in Pullampet.	Nothing in Ráyachóti.
" 3,250 in Madanapalle.	Rs. 560 in Badvel.
" 2,680 in Váyalpád.	" 370 in Sidhout.
Nothing in Kadiri.	

3. On the other hand, the estimates awaiting sanction amount to nearly Rs. 9,000 in Pullampet, Rs. 5,200 in Madanapalle, Rs. 5,090 in Váyalpád. It is desirable that these estimates should, if possible, be at once sanctioned.

4. It will be observed also that there are estimates for considerable sums under preparation, particularly in Ráyachóti and Badvé, where there are no other works available.

5. The Executive Engineer tells me that his staff is too weak to enable him to complete and submit these estimates at once. The Superintending Engineer Colonel Smalley has often said the same thing when I have called on him for professional assistance in connection with minor irrigation works information called for by the Board, &c.

6. It would seem desirable, therefore, that some additional help in the shape of overseers and draftsmen should be given to the Executive Engineer to enable him to complete and submit the estimates he has under preparation.

7. I may note that the one estimate entered as being with me has been countersigned and returned.

8. The places, where there is least work available, are Ráyachóti, Kadiri, Sidhout and Badvé and of these Ráyachóti and Badvé are those where it is most wanted. In these two taluks the want will be met to some extent if the estimates under preparation can be rapidly completed and sanctioned.

9. I beg to submit copy of a letter received from the Chief Engineer, South Indian Railway, from which it will be seen that there is much more work suited for unskilled labor available on the Villupuram-Guntakal Railway than I had supposed. It seems to me that at present no more work is wanted in the sub-division with the possible exception of the Ráyachóti taluk. It would be well, however, to have all the estimates possible got ready in case of need.

10. At present the only action I have taken on the Chief Engineer's letter is to have notices widely published that there is plenty of work to be had on the Villupuram-Guntakal Railway. It will, no doubt, be necessary to arrange in the course of some weeks that heads of villages shall be authorised to give all destitute persons wanting work tickets. Certain centre on the railway should be fixed for the presentation of these tickets. Any one showing a ticket should be entitled to employment, and, if not able to do full work, should, if possible, be employed on task work. In any case he should not be turned off except in communication with the Revenue officers.

11. If these general lines are approved I will communicate with the Chief Engineer. At present there would be no one to send.

ENCLOSURES.

From M.R.Ry. S. SUBRAYACHARIAR, Avergá, B.C.E., Rai Bahadur, Executive Engineer, Cuddapah division, to the Collector of Cuddapah, dated Cuddapah, 5th March 1891, No. 667.

In reply to your No. 196, dated 24th ultimo, regarding Imperial "irrigation works" in progress and likely to be sanctioned for immediate execution, I have the honor to forward the accompanying list of such works for your information and further instructions in the matter. Therein I have not included works that may be estimated for hereafter during the course of coming official year.

2. In Pulivendla only one tank and three channels are classed as "Imperial" and as these do not demand any immediate attention and as my establishment is limited we are not now working there, and hence no estimate either prepared or in hand. In Ráyachóti only three tanks are classed as "Imperial" and these all have been repaired, but there is an estimate in hand and under revision for improving the Hastanapuram tank for raising its capacity, and this estimate I have included in the list. In Sidhout all the important works have been lately repaired and completed. Two more estimates will be prepared, but, as they will be later in the year, I have not included them.

3. If any labor be available your Tahsildars may be instructed to send them to my subordinates for work under ordinary rules.

CUDDAPAH DIVISION.

List of Imperial irrigation works in progress and likely to be sanctioned for immediate execution.

Taluk.	Name of work.	Amount or balance of estimate.	Remarks.
		RS.

From the Acting Chief Engineer, South Indian Railway, to the Collector of Cuddapah, dated Trichinopoly, 25th February 1891, No. 1484-1662 V. G.

[Your No. 196 V.G., dated 19th February 1891.]

There is still a large amount of earth-work and ballast to be done on this railway between Váyalpád and Mudegubba and there is no doubt ample opening for a large number of work people who are willing to do a fair day's work for a fair wage.

The work on the railway is being carried out by petty contractors, but if there were any large body of work people that want employment it may be possible to make special arrangements, if this has to be done I should require full information to arrange for it, I am sure that a very large number would obtain employment from the contractors now employed if they will apply for it.

ORDER—dated 16th March 1891, No. 200, Revenue.

Miscellaneous.

Orders will at once issue in the Department of Public Works for the speedy preparation of estimates for all the works entered in the Executive Engineer's list, the necessary additional staff being provided for the purpose and for the sanction of the estimate which are ready.

2. It will also be considered in the Department of Public Works whether any more works can be made available in other taluks of Ráyachóti, Kadiri, Sidhout and Badvel.

3. In taluks in which the work available on major irrigation works and the railway is likely to prove insufficient, minor irrigation works and Local Fund

works must be provided and the Collector should at once draw up a programme and get estimates ready without loss of time.

4. The proposal in paragraph 10 is approved.

BOARD OF REVENUE (REV. SETT., L. RDS. AND AGRI.), 6TH MARCH 1891, No. 118.

PROCEEDINGS OF THE BOARD OF REVENUE
(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE)

MR. CLOGSTOUN.

READ—again Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 4th February 1891, No. 56.

ABSTRACT.—Submitting to Government, with Board's remarks, special report from the Collector of Cuddapah on the state and prospects of the season in the district.

READ—also the following letter from E. J. SEWELL, Esq., Acting Collector of Cuddapah, to the Secretary to the Commissioner of Revenue Settlement and Director of the Department of Land Records and Agriculture, dated Cuddapah, 1st March 1891, Ref. on Current No. 196-Ver. :—

With reference of paragraph 9 of Board's Proceedings, No. 56, dated 4th February 1891, I have the honor to submit that the Chief Engineer, South Indian Railway, reports that there is a large amount of earth-work and ballast still to be done on the Railway between Váyalpád, and Mudégubba, i.e., nearly along the whole line and within the three taluks of Váyalpád, Madanapalle and Kadiri. This will find work for a large number of unskilled laborers.

2. The Sub-Collector through whose division the railway runs has been informed of this and requested to direct the Tahsildars of Váyalpád, Madanapalle and Kadiri to take active steps to publish in the villages of their taluks that labor is available on the Railway line, and to direct the heads of villages to inform the laboring classes of the same.

RESOLUTION—dated 6th March 1891, No. 118.

Submitted for the information of Government with reference to the Proceedings quoted by the Collector.

REVENUE DEPARTMENT.

1891.

Board of Revenue

(Revenue Settlement, Land Records
and Agriculture),

MADRAS.

Printed March 12th.

Proceedings, 6th March 1891, No. 118.

Submitting for the information of Government letter from the Collector of Cuddapah furnishing certain information called for in Board's Proceedings, No. 56 of 1891 as to what extent and in what localities work suitable for unskilled labor still remains to be done with reference to the present state of the season in the district.

Read - the following paper:-
G.O., dated 16th March 1891, No. 500, Revenue

Revenue Department. 1891

Proceedings of the Madras Government.
Read Proceedings of the Board of Revenue (Settlement)
dated 6th March, 1891, No. 118, Pres.

Read - also the following letter from the Collector of Cuddapah
dated 9th March 1891 Ref: on Current No. 196

With reference to Government Order No. 11:-
Revenue dated 16th February 1891 para 1, I have the honor
to submit a copy of a letter from the Executive Engineer
forwarding a list of works available or likely to be
available for the employment of laborers.

2 From this list it will be seen that the Department
have but few sanctioned works on hand in the
affected taluks. The amounts are a little over

Rs 5000 in Pullumpett
Rs 3250 in Madanapalle
Rs 2680 in Vayalapaund
nothing in Hadiri
nothing in Royachoti
Rs 560 in Budwel
Rs 370 in Sidhant.

3 On the other hand the estimates awaiting sanction
amount to nearly Rs 9000 in Pullumpett, Rs 5200 in
Madanapalli, Rs 5090 in Vayalpaund. It is
desirable that these estimates should if possible
be at once sanctioned.

4 It will be observed also that there are estimates
for considerable sums under preparation parti-
cularly in Royachoti and Budwel where there
are no other works available.

5 The Executive Engineer tells me that his staff is too
weak to enable him to complete and submit
these estimates at once. The Superintending
Engineer Col. Dunalley has often said the same thing
when I have called on him for professional assist-
ance in connection with minor irrigation works
information called for by the Board.

6 It would seem desirable therefore that some addi-
tional help in the shape of overseers and
draughtmen

Executive Engineer's Office
Cuddalore - 5-3-91.

San. No. 664

From,

M. R. M.

S. Subramanian avarul
P. & R. B. B. B.

Executive Engineer
Cuddalore D.

To, The Collector of Cuddalore.

Sir, In reply to your No. 196,
dated 24th ultimo regarding Imperial
Irrigation works in progress and
likely to be sanctioned for immediate
execution, I have the honor to forward
the accompanying list of such work
for your information and further
instructions in the matter. Therein
I have not included work that
may be estimated for hereafter
during the course of coming official
year.

2. In Pulicat delta only
one tank and 3 channels are
lapsed.

draughtsmen should be given to the Executive Engineer to
enable him to complete and submit the estimates he
has under preparation.

7. I may note that the one estimate entered as being
with me has been counter signed and returned.

8. The places where there is least work available
are Royachoti, Kadiri, Sirkhout and Budwell
and of these Royachoti and Budwell are those
where it is most wanted. In these two Taluks
the want will be met to some extent if the
estimates under preparation can be rapidly
completed and sanctioned.

9. They to submit copy of a letter received from
the Chief Engineer S. J. R. from which it will be
seen that there is much more work suited for
unskilled labor available on the Villupuram
Guntakal Railway than I had supposed. It seems
now that at present no more work is wanted
in the sub-division with the possible exception
of the Royachoti taluk. It would be well,
however, to have all the estimates possible
got ready in case of need.

10. At present the only action I have taken on the
Chief Engineer's letter is to have notices widely published
that there is plenty of work to be had on the
Villupuram - Guntakal Railway. It will no doubt
be necessary to arrange in the course of some weeks
that heads of villages shall be authorized to give
all destitute persons wanting work tickets. Certain
centres on the Railway should be fixed for the present
allocation of these tickets. Any one showing a ticket should
be entitled to employment and if not able to do full
work, should if possible be employed on task
work. In any case he should not be turned off
except in communication with the Revenue
officers.

11. If these general lines are approved I will communicate
with the Chief Engineer. At present there would be no
one to send.

closed as "Imperial" and as these do not demand any immediate attention and as my establishment is limited we are not now ~~now~~ working there and hence no estimate either prepared or in hand. In Rayachoti only 3 tanks are closed as "Imperial" and these all have been repaired but there is an estimate in hand and under revision for improving the Hastanapuram Tank for raising its capacity and this estimate I have included in the list. In Sedhant all the important works have been lately repaired and completed. 2 more estimates will be prepared but as they will be later in the year I have not included them.

3. If any labor be available your Tahsildars may be instructed to send them to my subordinates for work under ordinary rules.

For aq. Collector.

Order thereon: 16th March 1891 Rs 200. 28/12

9 p.m.

Orders will at once issue in the department of Public works for the speedy preparation of estimates for all the works entered in the Executive Engineer's list, the necessary staff being provided for the purpose and for the sanction of the estimates which are ready.

2. It will also be considered in the department of Public Works whether any more works can be made available in other taluks of Rayachoti Kadiri, Sidhout & Budwel.
 3. In taluks in which the work available on major Irrigation works and the Railway is likely to prove insufficient minor Irrigation works and local fund works must be provided and the Collector should at once draw up a programme and get estimates ready without loss of time.
 4. The proposal in para 10 is approved.
