READ—again G.O., dated 17th June 1890, Mis. No. 3739, Revenue.

ABSTRACT.—Recording G.O., Local and Municipal Department, dated 9th June 1890, No. 1418 L., Mis., transferring papers regarding famine relief works in Malabar.

ORDER—dated 24th February 1891, No. 140, Revenue.

Miscellaneous.

The papers read above relate to the programmes for 1890-91 of Civil Agency works reported by Collectors, by Presidents of Local Fund Boards, and by Chairmen of Municipal Councils to be suitable for famine relief in the several districts of this Presidency. No programme has been prepared either for Malabar or for South Canara, as these districts are practically secure against famine.

2. The nature of the various works proposed and a probable estimate of their cost are shown in the statements appended to this order. The Collectors of the marginally-noted districts report that the programmes, submitted by them for 1889-90, hold good for the current year also, and in the case of these districts, only the Local Fund and Municipal works are shown.

Vizagapatam.	North Arcot.
Kistna.	Chingleput.
Nellore.	Trichinopoly.
Bellary.	Madura.
Anantapur.	Tinnevely.

3. The statements in the appendix have been compiled with considerable difficulty from the returns submitted by the officers concerned: in many cases a mere list of works is given without any attempt at classification and without totals of the expenditure involved. The Government, moreover, regrets to observe that the instructions regarding the proper date for submitting these returns, given in G.O., No. 1109, Revenue, dated 29th November 1887, have been disregarded. The returns for 1890-91 should have been received in the Government office before the 1st March 1890, so that the lists for the whole Presidency might have been submitted to the Government of India by the 1st April 1890: in spite, however, of frequent reminders, many officers failed to submit their returns before the middle of the year, and in some cases no information was furnished until November and December 1890. The general returns have for this reason been delayed, and will not reach the Government of India much before the returns for 1891-92 are expected.

4. The Government, moreover, considers that in their present form the lists do not in many cases serve the purpose for which they are required. It is desirable that the Government should be in the possession of a list of works suitable for relief purposes in each taluk, so that when the necessity for starting works arises, it may be possible to make selections at once with reference to the localities in which the demand for employment has arisen. It is not, however, necessary that the particulars of numerous works of a petty nature should be furnished, and it will suffice if all works estimated to cost Rs. 5,000 or more are entered separately. Minor works should be lumped together under separate heads, such as repairs to roads, construction of tanks, and the like. There is at present nothing to show whether estimates are in readiness for the numerous works shown in the lists, whereas this is a most important point and is what the Famine Code requires.

5. The Government accordingly directs that in the preparation of future lists the following instructions be complied with:—On or before the 1st January in each year, Chairmen of Municipalities and Presidents of Local Boards will furnish the Collectors of their respective districts with lists of works available for relief purposes, those of their regularly prepared estimates are kept ready being specially noted. From these lists Collectors will compile talukwar lists for their respective districts, showing separately the works proposed by themselves and those proposed by Local Boards and Municipalities. In the Collectors' lists only works costing Rs. 5,000 and more should be entered separately, the remainder being dealt with as indicated in the preceding paragraph. It is essential that estimates should be prepared for a sufficient number of works, and a note should be made against each work for which this has already been done. Every year more of these estimates should be got ready, until it can be certified that labor is available on works for which estimates are ready, for at least 5 per cent. of the population. The Collectors' lists should be submitted to Government through the Board of Revenue by the 15th February in each year and will be taken as proposals for the year beginning with the following April. The lists should be forwarded to Government before the 1st March. From these lists statements will be prepared for each district showing the amount of work that could be provided at once,

and the number of persons who could be employed thereon. Copies of these statements will be forwarded to the Government of India, which will now be asked whether the above instructions meet with its approval. It must be remembered that the Government of India desires to be furnished with this information by the 1st April in each year, and all officers should therefore use their best endeavours to send in their lists on or before the prescribed dates.

6. The Collector of Godavari submits, for the current year, a *nil* return for his district. It was admitted in G.O., dated 6th November 1888, No. 759, that this district was practically safe from famine, but the Government desires that the Collector should nevertheless prepare an annual list of relief works.

7. It is observed that no relief works are proposed for the Patukota taluk in the Tanjore district. The Collector states that the matter is being attended to; he should now submit, as soon as possible, a statement showing what works might be started in that taluk in the event of the occurrence of famine.

8. A list of Professional Agency works suitable for execution by famine labor was forwarded to the Government of India with letter dated the 20th May last, No. 349.

9. The following letter will be despatched to the Government of India:—

(Here enter No. 141, dated 24th February 1891.)

(True Extract.)

Secretary to Government.

To the Commissioner of Revenue Settlement, Land Records and Agriculture.
 „ the Public Works Department.
 „ the Local and Municipal Department.

APPENDIX.

GANJAM DISTRICT.
