GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers :—

G.O., dated 31st January 1890, No. 156, Judicial.

Letter from the Inspector-General of Jails, dated 6th February 1890, No. 52.

Demi-official from the above officer, dated 10th March 1890.

Endorsement in the Judicial Department, dated Fort St. George, 29th March 1890.

The foregoing papers will be referred to the Public Works Department for favor of issue of necessary orders for a special report being submitted to Government in this department, with estimate, as to whether the pump can be worked at one side of the well, either in the manner indicated by the Inspector-General or by means of a beam pivoted on the edge of the well, with perhaps guides or a parallel bar motion at the end of the beam.

(Signed) A. G. CARDEW,
Under-Secretary.

From G. D. WYBROW, Esq., Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated Dowlaishweram, 12th December 1890, No. 1808 G.D.

With reference to para. 4 of your memo. No. 1776 C., dated the 9th April 1890, regarding certain improvements to the building of the Central Jail at Rajahmundry, I have the honor to inform you that an estimate has been framed, amounting to Rs. 2,680, which allows for the several improvements, recommended by the Inspector-General of Jails.

2. The chief points by the Inspector-General of Jails are as follows :—

Para. III of the Inspector-General's letter—The ridge ventilators project too little over the roof, allowing the rain to beat in.—It would be costly to remove the whole of the roof ventilators and it is proposed to add a projection of zinc sheeting, so as to afford additional protection against the rain beating.

Increased ventilation of wards.—This is allowed for as recommended by the Inspector-General of Jails by opening out large barred windows, with shutters, at the ends of all the wards and barred ventilators in the gable ends of the wards as well as in the partition walls of the several wards. For the better ventilation of the buildings with terraced roofs, cowls are provided of 8″ diameter, similar in pattern but larger to those already fixed in other parts of the jail.

3. *Para. IV of the Inspector-General of Jails.*—The estimate now framed includes removing the parapet wall erected for the protection of the police sentries and erecting in its place an iron railing, 3 feet in height. The removal of the filling in between the rafters and top of walls of the hospital is allowed for in the estimate. The filling in is only composed of broken brick in chunam and can easily be removed.

4. *Para. V—Well.*—The proposals regarding the pump over the well have already been sanctioned in G.O., No. 2085 W., dated 31st July 1890.

5. The Superintendent of the Jail informs me that, in carrying out the enclosed estimate, no convict labor will be available.

6. The enclosures of your memorandum under reply are herewith returned.

2 * * * * *

The difficulty connected with the well from which the jail drinking water is obtained is less easily removable, and experience alone will show whether the Inspector-General's suggestions, which should at once be carried out, are adequate. It should be considered whether the pump could not be moved to the side of the well so as to get rid of the platform over it. * * * * *

THE CHIEF ENGINEER
P.W. Department
~~FOR IRRIGATION.~~

DOWLAISHWERAM, 12th December 1890
Decd 18th

SIR,

With reference to para 4 of your Memo No 1776 C dated the 9th April 1890 regarding certain improvements to the building of the Central Jail at Rajahmundry I have the honor to inform you that an estimate has been framed, amounting to Rs 2,680, which allows for the several improvements recommended by the Inspector General of Jails.

2. The chief points by the Inspector General of Jails are as follows:- Para III of the Inspector General's letter the pidge Ventilators project too little over the roof, allowing the rain to beat in. It would be costly to remove the whole of the roof ventilators, & it is proposed to add a projection of zinc sheeting, so as to afford additional protection against the rain beating. Increased ventilation of wards This is allowed for as recommended by the

Inspector General of Jails by opening out large barred windows, with shutters, at the ends of all the Wards, & barred ventilators in the gable ends of the wards as well as in the partition walls of the several Wards. For the better ventilation of the buildings with terraced roofs, cowls are provided of 8" diameter, similar in pattern but larger, to those already fixed in other parts of the Jail.

3. Para IV of the Inspector General of Jails. The estimate now framed includes removing the parapet wall erected for the protection of the Police sentries, and erecting in its place an iron railing 3 feet in height. The removal of the filling in between the rafters & top of walls of the Hospital, is allowed for in the estimate. The filling in is only composed of broken brick in chunam & can easily be removed.

4. Para V Well.

The proposals regarding the pump over the well have already been sanctioned in G.O. No. 2085 Ws. d/ 31st July 1890.

5. The Supt. of the Jail informs me, that in carrying out the enclosed estimate no convict labor will be available.
