No 913. 3rd Feb 1891

Dear Sir

In reply to your letter
No 870 & dated 2nd Feb 1891
I beg to inform you that the
boat at the Red Mills was
39.62 (P.U.D 40.98) on the
1st Feb. The return for the 2nd
has not come in.

On the 1st Feb 1890 it was
42.93 (P.U.D 44.29)

We have this about 80 days
up supply in the Lake than
this time last year

I am
Yours faithfully
Edmund Peacock M/assistant
Secy. to the P.U.D. J. M. Moore

furnace - 5/1

The amount of water
available without
pumping is about
five months supply,
and the reservoir con-
tains a further
amount of about
six months supply
which can be made
available by pumping -

3 There is therefore no
fear of the ^{water} supply
running short,
provided irrigation
is stopped -

4 Pumping will be necessary
if no rain sufficient
to produce a freshet
in the Costelloian
does not fall before
the end of June - This

One out of several ones
since the water
of the tank in 1880.

I.W. Department.

Letter from Colonel G. M. Moore
President, Madras Municipal Commission, dated
3d February 1891. No. 913.

Submitted for the
information of His
Excellency the Governor.

2. The amount of water
available without pumping
is about five months
supply, and the reservoir
contains a further amount
of about six months supply
which can be made
available by pumping.

3. There is therefore no
fear of the town water
supply running short,
provided irrigation is
stopped.

4. Pumping will be
necessary if rain sufficient

Disturbed on

The Committee reported that
this has been done, I think.
Nothing is said about letting
in a supply from Cholavaram
which I think is possible. There
seems not much danger of pump
being required for any long period
if at all.

to produce a fresh in
the Cortilliar does not
fall before the end
of June. This has only
occurred once since
the restoration of the
tank in 1885.
