GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 7th April 1892, No. 273 :—

MR. CLOGSTOUN.

Read—the following fortnightly narrative for the period ending 31st March 1892, from the Acting Collector of Kurnool, dated 3rd April 1892, No. A :—

STATE OF COUNTRY—*Crops.*—Standing crops are second crop paddy, ragi, bengal-gram, cholum; garden crops, korra, tobacco and sweet potatoes. Ragi under wells, linseed, castor oil and bengal-gram being harvested in parts. Yield of ragi and bengal-gram about 6 annas each. Paddy withering in parts under the canal. Cotton picking almost over; 35,800 acres actually irrigated under the canal up to the end of February 1892. This is the information required in paragraph 2 of Board's Proceedings, No. 236, dated 25th March 1892.

Fodder.—Insufficient except under the canal, scanty in Ramallakota and dear in the whole of Nandyal division. In Pyapali division, where the use of prickly-pear as fodder is known to the ryots, the Divisional officer reports that it will be resorted to only as the last alternative. Ragi stalks, leaves of the neem and palmyra trees, pods of the babul and fruit of the prickly-pear are used in Cumbum division. Experiments with prickly-pear were made in 13 villages of Cumbum. Thirty-nine cattle belonging to nearly as many pattadars were fed with it. Divisional officer says it is not likely that the people of Cumbum taluk will use it largely. One hundred cattle in Markapur taluk are now accustomed to eat it. A few emaciated cattle have been placed in charge of Stock Inspectors who are feeding them with prickly-pear and who will take them wherever they go. Some of these cattle are being taken about by the Tahsildar of Markapur and the Revenue Inspector of Cumbum firka. A statement showing the progress made in cutting and stacking hill grass is enclosed.

Water-supply.—Growing scanty in Kunder river and considerably reduced in wells in Pyapali division. Water is brought in some villages of this division from a distance of two miles. Divisional officer has issued orders to excavate a well near the Iticala section of Owk-Tadpatri road and to repair another in the vanka passing by Raghavarajupuram to supply water for over 1,000 coolies and to the people of Ankireddypalli. Two wells near Maddikera have been cleared out and are now in use. Sufficient in Kurnool division except in six villages of Nandikótkur taluk. Water scarcity continues in the north-east corner of Nandyal taluk. Scanty in Cumbum division.

Agricultural operations.—Cultivation under wells vigorously going on and regar lands being ploughed in Pyapali division. Practically *nil* except sugar-cane cutting in Nandyál division. In Cumbum division cultivation under wells is going on here and there as well as ploughing of soft dry lands in anticipation of the south-west monsoon. Black cotton soils being broken by hand labour in some parts of Pattikonda.

Cattle.—Working cattle in good condition in Pyapali division, the rest deteriorating. Those in affected parts of Kurnool division getting poor. Most of the cows and bulls in Márkapur taluk have been sent to the Nallamalais and their condition is reported bad.

General remarks on above subjects.—About two ounces of rain in and around Cumbum fell on the 31st March, accompanied by hail stones of the size of peas. Divisional officer thinks that this rain was general throughout the division, but in the

4. From the statement appended, it will be seen that prices have become rather easier for all grains, and that cholum, the staple food-grain, is now everywhere procurable at or cheaper than the scarcity rate. It is, moreover, 72 per cent. cheaper than it was in March 1877. Trade is generally active in the staple dry food-grains as well as in rice from the Kistna district. The people in the villages appear to maintain their normal state, but in Cumbum there has been an outbreak of cholera on two of the relief works, and the Collector mentions that only two of the four medical subordinates applied for have been sent to the district. The Commissioner trusts that the Surgeon-General with the Government of Madras will be able to depute the additional officers applied for to the district. The Commissioner does not consider it advisable to provide latrines on the works, as, in the wide open plains where they are proceeding, it will suffice if the coolies are obliged to go to a distance from the roads. Closed latrines are very likely to become a nuisance.

The improvement noted in the physique of the coolies on the Dornal and Dupad roads is satisfactory, but it is to be regretted that inefficient supervision or excessive tasking should have necessitated the concession of a minimum wage on these works—a concession not found necessary on any other work in the district.

5. The following statement shows the number of coolies employed upon relief works in each taluk of the district since the beginning of the year:—

Taluks.	Average during		March				April 2nd.
	January.	February.	5th.	12th.	19th.	26th.	
Márkápur	C.A. 4,463	5,358	6,396	6,698	6,679	6,653	6,183
	P.A. 518	1,198	1,410	1,208	1,473	1,522	1,630
	Total .. 4,981	6,556	7,806	7,906	8,152	8,175	7,813
Cumbum	C.A. 2,067	2,556	2,582	2,974	2,996	3,022	2,509
	P.A. 1,658	2,770	5,162	4,209	6,199	6,452	6,861
	Total .. 3,725	5,326	7,744	7,183	9,195	9,474	9,370
Koilkuntla	C.A. 195	641	1,182	1,691	1,917	2,032	1,986
Nandyál	P.A. ..	..	..	..	162	162	..
Nandikótkur	P.A. 197	494	599	753	415	423	367
Rámallakót	C.A. 534	318	303	377	531	565	375
	P.A. ..	481	898	768	585	608	696
	Total .. 534	799	1,201	1,145	1,116	1,173	1,071
Pattikonda	C.A. ..	555	323	336	205	413	369
	District Total .. 9,632	14,371	18,555	19,014	21,162	21,852	20,916

P.A. = Works under Public Works Department.

The decrease shown in the numbers returned during the last week is attributed to the occurrence of the New Year's day during the week having drawn away coolies who had not all returned when the reports were submitted.

6. The next abstract shows the numbers fed at the relief kitchens since the beginning of the year:—

Taluks.	January			February		March		April 2nd.
	9th.	16th.	30th.	13th.	27th.	12th.	26th.	
Márkápur	109	118	162	97	213	157	231	193
Cumbum	216	214	261	270	295	261	241	243
Koilkuntla	..	..	..	..	..	..	35	35
Total ..	325	332	423	367	508	418	507	471

The kitchens in Koilkuntla have been newly opened during the period under notice, and the Collector observes that the coolies are unwilling to send their children alone to them. In the last famine children resorted freely to the kitchens in that taluk, and, if they are at present unwilling to do so, it may be taken as a sign that the kitchens are not urgently needed. The kitchens, however, should for the present be kept open.

7. In the second statement appended, particulars are given as fully as possible regarding the loan transactions up to the 26th March. The Collector's statement apparently refers to the transactions of the fortnight. There are considerable numbers of applications pending for loans for the purchase of fodder in Cumbum, Koilkuntla and Nandikótkur, and a large number also of applications for well loans pending in Koilkuntla.

PROCEEDINGS OF THE BOARD OF REVENUE

(Revenue Settlement, Land Records and Agriculture).

Mr. Clogstoun.

Read—the following fortnightly narrative for the period ending 31st March 1892, from the Acting Collector of Kurnool, dated 3rd April 1892, No. A :—

State of Country—*Crops.*—Standing crops are second crop paddy, ragi, bengal-gram, cholum; garden crops, korra, tobacco and sweet potatoes. Ragi under wells, linseed, castor-oil and bengal-gram being harvested in parts. Yield of ragi and bengal-gram about 6 annas each. Paddy withering in parts under the canal. Cotton picking almost over; 35,800 acres actually irrigated under the canal up to the end of February 1892. This is the information required in paragraph 2 of Board's Proceedings, No. 236, dated 25th March 1892.

Fodder.—Insufficient except under the canal, scanty in Ramallakota and dear in the whole of Nandyal division. In Pyapali division, where the use of prickly-pear as fodder is known to the ryots, the Divisional officer reports that it will be resorted to only as the last alternative. Ragi stalks, leaves of the neem and palmyra trees, pods of the babul and fruit of the prickly-pear are used in Cumbum division. Experiments with prickly-pear were made in 13 villages of Cumbum. Thirty-nine cattle belonging to nearly as many pattadars were fed with it. Divisional officer says it is not likely that the people of Cumbum taluk will use it largely. One hundred cattle in Markapur taluk are now accustomed to eat it. A few emaciated cattle have been placed in charge of Stock Inspectors who are feeding them with prickly-pear and who will take them wherever they go. Some of these cattle are being taken about by the Tahsildar of Markapur and the Revenue Inspector of Cumbum firka. A statement showing the progress made in cutting and stacking hill grass is enclosed.

Water-supply.—Growing scanty in Kunder river and considerably reduced in wells in Pyapali division. Water is brought in some villages of this division from a distance of two miles. Divisional officer has issued orders to excavate a well near the Iticala section of Owk-Tadpatri road and to repair another in the vanka passing by Raghavarajupuram to supply water for over 1,000 coolies and to the people of Ankireddypalli. Two wells near Maddikera have been cleared out and are now in use. Sufficient in Kurnool division except in six villages of Nandikótkur taluk. Water scarcity continues in the north-east corner of Nandyal taluk. Scanty in Cumbum division.

Agricultural operations.—Cultivation under wells vigorously going on and regar lands being ploughed in Pyapali division. Practically *nil* except sugar-cane cutting in Nandyál division. In Cumbum division cultivation under wells is going on here and there as well as ploughing of soft dry lands in anticipation of the south-west monsoon. Black cotton soils being broken by hand labour in some parts of Pattikonda.

Cattle.—Working cattle in good condition in Pyapali division, the rest deteriorating. Those in affected parts of Kurnool division getting poor. Most of the cows and bulls in Márkapur taluk have been sent to the Nallamalais and their condition is reported bad.

General remarks on above subjects.—About two ounces of rain in and around Cumbum fell on the 31st March, accompanied by hail stones of the size of peas. Divisional officer thinks that this rain was general throughout the division, but in the

absence of reports from Tahsildars he is not sure that he is right. Now that the Telugu new year's day has gone, agricultural operations will come to a standstill; numbers requiring employment may increase. There were thunder-storms near my camp (Maddikera) on the 1st instant and near Dhone on the 2nd. A few drops of rain fell here last night.

Condition of the People—*On works.*—Generally healthy. There is vast improvement in the physique of the coolies on the Dornal and Dupad road works owing to the personal attention of the Divisional officer and to the introduction of the payment of minimum wages.

In villages.—None starving.

Mortality.—None from starvation. Influenza is prevalent in Cumbum taluk where there have been a few cases of cholera. Deaths from the latter 26 out of 46 attacks during the fortnight. It broke out on the works on Cumbum and Basinepalli tanks. The Public Works Department Sub-Divisional officer Mr. Lawrence was attacked and had a narrow escape. A special Hospital Assistant is on duty.

Sickness.—Fever throughout the district, small-pox, measles, cholera, influenza and guinea-worm in Cumbum taluk, small-pox and guinea-worm in the Markapur taluk and pneumonia in Nandyál division.

Remarks.—Of the four medical subordinates applied for, only two have been deputed. The Surgeon-General has been asked to send one more at least. The District Medical and Sanitary officer has arranged for the frequent inspection of the coolies in the Cumbum taluk, and the Divisional officer has asked for similar arrangement in Márkápur taluk. The cheap huts commenced in the previous fortnight for the shelter of coolies on the Dornal-Dupad and Giddalore works are nearly complete. The want of latrines is much felt here and sanction will be applied for at once. Hot westerly winds began to blow on the 24th March and continue to do so in Cumbum division.

Relief Measures.—*Relief works in what taluks open.*—Pattikonda, Rámallakót, Nandikotkur, Koilkuntla, Cumbum and Márkapur.

Poor-houses in what places and the numbers fed at each.—No poor houses. A kitchen has been opened in Cherlopalle and Raghavarajupuram. Five kitchens already exist in Cumbum division. The one sanctioned in Maddikera has not yet been opened and is certainly not required yet. The following table exhibits the number fed in each:—

Kitchens.	Number fed.				Remarks.
	Men.	Women.	Children.	Total.	
Koilkuntla taluk.					
1. Cherlopalle kitchen	4	5	26	36	Number on each not reported.
2. Raghavarajupuram kitchen					
Cumbum taluk.					
1. Palakavid kitchen	24	42	140	206	On 26th March.
2. Taticherla road work kitchen	2	2	31	35	
Markapur taluk.					
1. Márkapur kitchen	14	18	79	111	
2. Dornal kitchen	9	5	32	46	
3. Dupad do.	8	5	61	74	
Total ..	61	77	369	507	

Village relief—Number of villages in each taluk of which reports of—have been received.—Nil.

Number of cases of death from want of food with brief notes of circumstances if possible.—Nil.

1304/6

Remarks.—In Koilkuntla taluk the coolies are stated to be unwilling to allow their children under 7 years to go alone to kitchens, but wish to be allowed to accompany them. They are also under the impression that the children will get sick if fed in kitchens. These reasons are given to account for the small numbers in the new kitchens. My own impression is that the new kitchens were unnecessary until after new year's day. Later on, as the pinch of famine is more keenly felt, a greater number may resort to them.

Grain Supply—*Private trade active or not; whether in rice or dry staple food-grain.*—Active generally in staple dry food-grain. Moderate in Cumbum division.

State the imports by rail or sea of rice or other staple food-grain.—Rice is imported into the Nandyál division from Kistna by rail. Staple food-grains are imported into the Cumbum division by rail from Guntúr, Kistna canal and Narsaraopet.

Known or estimated stock in taluks.—Sufficient for about four months in Pyapali and Cumbum divisions and Nandyál taluk, about nine months in Sirvel taluk and about a year in Kurnool division.

State of Markets—

—	Prices at chief markets of principal food-grain.				Rising at	Falling at	Stationary at
	Rice.	Cholum.	Ragi.	Cumbu.			
Kurnool	9·26	15·67	..	..	..	..	Kurnool.
Nandyál	8·9	15·7	15·5	12·5	Nandyál as regards cumbu.	Nandyál as regards cholum.	Nandyal as regards rice and ragi.
Cumbum	8·25	12·64	12·4	11·6	..	..	Cumbum.
Márkápur	9·13	14·22	13·5	13·15	Márkápur as regards cumbu.	Márkápur as regards cholum.	Markapur as regards rice and ragi.

Loans.—The transactions are exhibited in the appended table in the form prescribed in Board's Proceedings, No. 157, dated 29th February 1892, as amended by Board's Proceedings, Mis. No. 2928, dated 23rd March 1892.

Taluks and places visited by the Collector during the fortnight.—Rámallakót taluk, work on Kurnool and Bellary road 26th March about 500 coolies mostly in good condition; Tekur 30th March; Veldurty 31st March; tank repair going on under Public Works Department, about 600 coolies in good condition.

Resolution—dated 7th April 1892, No. 273.

Submitted for the information of Government.

2. Except as to the crops watered from wells and, in the Pattikonda taluk, the breaking-up and clearing of the black cotton soil, no agricultural operations are going on in Kurnool. The supply of water in the canal has apparently failed, as paddy is reported to be withering under it. The total area irrigated up to the end of February last was only 35,800 acres as compared with a total of 75,105 acres irrigated in the year 1876–77. Fodder is scarce everywhere, but appears to be obtainable. Demonstrations of the use of prickly-pear leaves as fodder are being made. Cutting and storing grass has now been brought to a close except at Chelama, and 694 tons of grass have been secured at a cost of Rs. 4,352. The condition of the cattle except the working bullocks, is stated to be deteriorating, and the large numbers sent from Markapur into the Nallamalas for grazing are said to be in bad condition.

3. Supplies of drinking water are diminishing, but are everywhere obtainable though with some difficulty in places.

4. From the statement appended, it will be seen that prices have become rather easier for all grains, and that cholum, the staple food-grain, is now everywhere procurable at or cheaper than the scarcity rate. It is, moreover, 72 per cent. cheaper than it was in March 1877. Trade is generally active in the staple dry food-grains as well as in rice from the Kistna district. The people in the villages appear to maintain their normal state, but in Cumbum there has been an outbreak of cholera on two of the relief works, and the Collector mentions that only two of the four medical subordinates applied for have been sent to the district. The Commissioner trusts that the Surgeon-General with the Government of Madras will be able to depute the additional officers applied for to the district. The Commissioner does not consider it advisable to provide latrines on the works, as, in the wide open plains where they are proceeding, it will suffice if the coolies are obliged to go to a distance from the roads. Closed latrines are very likely to become a nuisance.

The improvement noted in the physique of the coolies on the Dornal and Dupad roads is satisfactory, but it is to be regretted that inefficient supervision or excessive tasking should have necessitated the concession of a minimum wage on these works—a concession not found necessary on any other work in the district.

5. The following statement shows the number of coolies employed upon relief works in each taluk of the district since the beginning of the year:—

P.A. = Works under Public Works Department.

The decrease shown in the numbers returned during the last week is attributed to the occurrence of the New Year's day during the week having drawn away coolies who had not all returned when the reports were submitted.

6. The next abstract shows the numbers fed at the relief kitchens since the beginning of the year:—

Taluks.	January			February		March		April 2nd.
	9th.	16th.	30th.	13th.	27th.	12th.	26th.	
Márkápur	109	118	162	97	213	157	231	193
Cumbum	216	214	261	270	295	261	241	243
Koilkuntla	..	..	..	..	..	..	35	35
Total ..	325	332	423	367	508	418	507	471

The kitchens in Koilkuntla have been newly opened during the period under notice, and the Collector observes that the coolies are unwilling to send their children alone to them. In the last famine children resorted freely to the kitchens in that taluk, and, if they are at present unwilling to do so, it may be taken as a sign that the kitchens are not urgently needed. The kitchens, however, should for the present be kept open.

7. In the second statement appended, particulars are given as fully as possible regarding the loan transactions up to the 26th March. The Collector's statement apparently refers to the transactions of the fortnight. There are considerable numbers of applications pending for loans for the purchase of fodder in Cumbum, Koilkuntla and Nandikótkur, and a large number also of applications for well loans pending in Koilkuntla.

(A true Copy and Extract.)

(Signed) P. RAJARATNA MUDALIAR,
Secretary.

To the Secretary to Government, Revenue Department.
" Collector of Kurnool.
