The Hon. Mr. H. W. Bliss.
The. Hon Mr. J. Grose.

Read—the following letter from W. DUMERGUE, Esq., Acting Collector of Malabar, dated 8th July 1891, Ref. on C. No. 2149 P. :—

With reference to the marginally-noted Proceedings of the Board, I have the honour to submit, herewith, for approval and transmission to Government, the plan and estimate, amounting to Rs. 23,700, for constructing the currency office in the premises of the new Collector's cutcherry at Calicut. The Superintending Engineer's letter No. 238 M., dated 4th June 1891, is enclosed.

Dated 16th Oct. 1890, No. 632.

„ 2nd July „ „ 4547 „

Resolution—dated 8th August 1891, Mis. No. 5668.

The estimate is submitted to Government with the Board's approval and with the following remarks :—

The currency office is to be substituted for the press office, and, as the cost of this is included in the estimated cost of the new Collector's office, viz., Rs. 1,89,970, the amount by which the present estimate exceeds it should have been stated.

The Board doubts if 1½ feet is a safe thickness for the walls of a treasury and thinks it would be better for the flooring to be of stone slabs than of cement.

From Lieut.-Colonel R. R. E. DRAKE-BROCKMAN, R.E., Superintending Engineer, IV Circle, to the Chief Engineer, Public Works Department (through the Collector of Malabar), dated 17th November 1891, No. 601 W.

With reference to your memo. No. 4146 C. of 18th September 1891, I have the honour to forward, duly revised, the plan and estimate, amounting to Rs. 26,700, for constructing a currency office in the compound of the new Collector's office at Calicut.

2. A report and a specification are attached with the estimate. Of late it is found impracticable to adhere to the rates shown in the divisional schedule as regards laterite in mortar, owing to the hitherto used quarries for laterite, situated at about 2 to 2½ miles from the new Collector's office, having been exhausted by the Railway Company and others, and no laterite of good quality being procurable there this department has been necessitated to open out new quarries, the nearest of which is about 5½ miles, *i.e.*, 3 miles beyond the old ones from the work. For 100 cubic feet of laterite, 200 stones (18″ × 9″ × 6″) are required, allowing breakage in dressing. Each cart will carry 20 stones and the additional cartage, 10 carts at 3 annas a mile, for 3 miles at 9 annas = Rs. 5-10-0, and this extra cost, when added to the rates given in the divisional schedule, will correspond with the rates now provided in the estimate under reference.

3. The rate (Rs. 4-6-0) for teakwood being a tendered one, there is no other alternative but to accept the same.
