be under his, the Superintending Engineer's supervision. I have no objection to the former proposal but I think that it would be advisable for this Department to be allowed to supervise the work in consultation with the Superintending Engineer of the Circle if necessary and so with other works. I request you will be good enough to obtain the orders of Government on this point as regards the Alipore Tank work and any other works of this Department selected as famine works.

Order thereon 11 May 1892 No 2345.

The Government is not prepared to accept the suggestion of the Sanitary Engineer that he should be associated with the Superintending Engineer in the supervision of sanitary works carried out as relief works; all works other than Local Fund works undertaken for purposes of relief should be executed solely under the supervision of the officers of the Public Works Department.
