PUBLIC WORKS DEPARTMENT.

READ--the following paper :--

The bill of lading of the 40 and 50 feet spans for the Vayitri-Gúdalúr road, which were supplied in accordance with the indent received with your letter No. 1920 W., dated 16th July 1890, has been returned to this country with the following remarks by the Port officer, Calicut :—

50-foot span.

40-feet span,

The Consulting Engineer states that no steps can be taken to replace the gussets, as, in consequence of there being several of about the same size, the exact gussets lost cannot be identified and that it is thought that they may be procurable in India.

The angle irons, however, he considers are probably not so procurable and they have therefore been ordered and are now on the point of being shipped to Madras, the port of Calicut being understood to be closed.

The estimated value of the gussets (£ 6) and the actual cost (£ 6) of the angle irons, together with 12s. 5d. for freight, has been deducted from the balance of freight per S.S. *Europa* payable in this country and a credit invoice accordingly will be shortly despatched.

Communicated to the officers concerned with reference to G.O., No. 1919 W., dated 16th July 1890.
