G. E. Manson Esq.

Executive Engineer

Salem Division

To

The Supt. Engineer

4th Circle, Coimbatore.

Sir,

I have the honor to call your attention to the dimensions allowed in the last type design for 1st Class Large Cut-cheries for the doors and doorways. In the case of the ordinary doors those dimensions are suitable. But for the Treasury-guard and cell doors, which are heavy iron doors with battens shutters, the size is much too large. The doors would be much too heavy and expensive.

As I am preparing the Estimates

I

I propose with your approval
to allow instead of.

<u>Standard plan</u>	<u>Proposed</u>
Iron grated door with strong buttressed shutter with frames 7 ¹ / ₂ — 4'-6" x 9'	3'-8" x 7'-8"
— 10' — 4' x 9'	3'-8" x 6'-8"
— 10' without shutters 4' x 8'	3'-6" x 7'-6"

For your reference and return
I enclose 3 (three) tracings of the
design I propose. I put up these
doors at Nagapattam and Str.
Vasiguntam Labeg Cutcher-
ries.

I have &c.

Signed G. E. Manson
Executive Engineer

In,

5. Enclosures.

Letter No. 213 W
of 2.5.92 from
the Supg. Engg.
4 Circle.

1 D.O. letter
3 Drawings.

In returning the papers marginally
noted, I have the honor to state that it is not
intended that the size of the Iron door should
be according to the dimensions stated, the
whole space will be filled by an Iron grating
and in the centre of the grating ^{there} will be a grating
shutter about 2'-9" x 6'-9". It is necessary that
the grating should be 4. 6" and 4. 8" wide as it
will give the guard a better view of the inside
of the wards through the grating & afford larger
area for ventilation. Detailed drawings of the
treasury guard's cell doors are under preparation
in communication with the Inspector General
of jails the Inspector General of Police and

with

will be duly submitted.

I have the honor to be
