From A. A. G. Mallet Esq. Recd.
Engineer, Northern Western Division,
to the Supt. Engineer, 2nd Div. 137th
16.5.92

I have the honor to inform you
that I have not got enough levels to
carry out the work in this division properly.

Of the two levels received from
N. More on the 9.2.92, one is quite
useless & is not I think repairable.
One level in the Quarter's Lake Division
is reported as useless for accurate
work - This level is said to be twenty
seven years old.

I consider that 4 more levels
are absolutely necessary to carry
out the work in this Division, & if another
subordinate is eventually posted
in connection with projects in upland
tallies, I shall require 5 more levels.

The above are I think required
permanently & not as a temporary
measure. Surveyors will be required
in connection with the delta works for
several years to come.
