Sir,

With reference to your endorsement
No. 243 P. W. S. 4th June 1892 on Chief Engineer's
Memo No. 2905 C of June 1892 I have the
honor to state that (1) owing to the want of
European supervision I am unable to look
after the students already undergoing practical
course.

(2) I have no one under me who is competent
to teach mechanical work and in the event of
the two subordinates already given, it would be
very hard to force the foreman to teach a man
(in addition to his own work which would be
quite heavy enough) without some pecuniary
recompense.

I have &c

FOR ORDERS.

If the object was
to enable Mr. Clay
to obtain knowledge
which would improve
his performance
of his regular duties
I should be disposed
to overrule the
Supply Engineer and
direct that the
necessary instruction
be given; but as
he seems to be
unable to do his

regular work to the satisfaction of his superior officers I do not think the Workshops should be called upon to aid him in qualifying for better employment

I agree.

Also I don't understand what is meant by a qualifying certificate in a mechanical Engineer. I am very much concerned to give the best of my knowledge and authority.

It would appear that the proposed Workshop course is not necessary to enable Miller St. Clay to obtain the knowledge requisite for the performance of his regular duties

which he seems
to discharge to the
satisfaction of his
superior officers,
but to qualify
him for better em-
ployment: and as
the Workshops cannot
undertake the
training without
considerable incon-
venience, His Excellency
the Gov^r in Council
is not prepared to
sanction the proposal.
