Constructing Dist. Munsif's Court House at Nandyal. Kurnool Dist.

Amount of Estimate Rs 16,700

In Memo No 5371 C dated 30th November 1891, the estimate for constructing a new Court House for the Dist. Munsif at Nandyal was returned to the Supdg Engineer III Circle with a request that any alteration considered necessary in the thickness of the walls for the adoption of coursed rubble masonry may made before sanctioning estimate. The S.E. returns the estimate duly raising the amount from Rs 16600 to Rs 16,700 and states that provision is now made

estimate for the
may increase in the thick
walls as directed in
means. 200/3

From the figures given in the detail estimate it will be seen that no material alterations are made, except that the retaining wall of the verandah has been increased in width from 9" to 12" & the extra width of 3" carried in the foundations and concrete as well, the by this alteration the estimate is increased by Rs 90 + Rs 1 [illegible] to form round numbers making Rs 100 in excess of the original estimate of Rs 16600

As the walls are proposed to be built of coursed rubble masonry, it is thought safe to increase the width of the partition walls from 1'1½" to 1'6" at least the mean height of these walls being 16 & 24½ feet. The estimate may be returned to the S.E. for the necess alterations

In the estimate for latrines the partition walls are only 6" thick & raised 5½ feet high.

200/85

200/3

The usual rough rule is to make the thickness of Rubble walls one-third greater than those of brick – The external walls in this case are 1'10½" which is more than

200
13

3rd Greater than
the theoretical
thickness — So
it may stand for
rubble — Laterite
being preferred
2' & 1½' respectively
for party & partition
walls, but with fair
work that allowance
would suffice
