TECHNICAL NOTE.

Respecting an erosion on the
North West side of the Prison
at Cochin.

Amount of Estimate Rs 500

The above estimate provides for
constructing a revetment as
to protect the Prison near
the backwater on the Cochin
side owing to the encroachment
of the sea which has eroded
the masonry of the old bastion
protecting the Prison at the
place. It is also stated that
in the report accompanying the
estimate that the encroach-
ment is likely to further de-
velop, during stormy weather, if
no steps are taken to prevent
it.

The proposed revetment is
to be built of rough stone of
large boulders laid in blocks
of old tabular masonry, well
thumbed by the action of the waves
which

B

which in their present position
are situated to form a substation.
which base for the continuation of
the reinforcement. The reinforcement
is to be built with a perpendicular
front face 2 feet wide at top to
4 ft at bottom & raised 4 1/2 ft high
backed for a width of 2 feet for
the height of 4 1/2 feet with smaller
stones of not less than 1/2 a cft
in size.

The rate of Rs 18 per 100 Cys for
reinforcement is high when com-
pared with the rate for brick, viz.
Rs 14, but it may be permitted
owing to the distance of carriage
of 16 miles from where the stones
are to be brought.

The item of Contingency is
changed to 7% but under
para 936 of the Code only 5%
is admissible.

The estimate is counterchecked
by the Presidency Port Officer &
approved in the Marine Dept.
The amount of the estimate being
within the sanctioning power
of the Super. Supt. is now
returned to that officer for
sanction.
