READ—the following paper:—

From Brigadier-General E. H. EYRE, Quartermaster-General, Madras Army, to the Secretary to Government, Military Department, dated Ootacamund, 2nd November 1891, No. 2426 M.W.

With reference to Proceedings of Government No. 198 of 10th January 1890 (Public Works Department No. 3645 W. of 21st December 1889), I am desired by the Commander-in-Chief to submit, for the favorable consideration and orders of Government, the marginally-noted correspondence containing a proposal that all the military stations comprised in the Madras Presidency now administered by the Public Works Department be transferred to the control of the Military Works Department and to state that, for the reasons therein adduced, His Excellency recommends that Government may be pleased to accord their approval to the above proposal, as he considers it very desirable that all stations in this command should be brought within the sphere of the operations of the Military Works Department and the present dual system of control over military buildings thus done away with.

Letter No. 8202 of 2nd October 1891, with two enclosures, from Chief Engineer, Military Works.
Quartermaster-General's minute No. 2261 M.W. of 8th October 1891 to Chief Engineer, Military Works.
Chief Engineer, Military Works, No. 8626 of 20th October 1891.

2. Should the Madras Government be pleased to accord their general sanction to the above proposals, it will be communicated to the Director-General, Military Works, in view to a detailed scheme for giving effect to the same being submitted for the orders of the Government of India.

ENCLOSURES.

From Colonel B. LOVETT, R.E., Chief Engineer, Military Works, Madras Command, to the Quartermaster-General, Madras Army, dated Ootacamund, 2nd October 1891, No. 8202. (1)

[*Formation of a new Military Works division.*]

I have the sanction of the Director-General contained in his No. 4110 A., dated 10th September, to lay certain proposals for a redistribution of duties in this command for the approval of His Excellency the Commander-in-Chief and the consideration of the Government of Madras before they can be submitted by the Director-General of Military Works for the orders of the Government of India. I have therefore the honour to report that, after inspecting the Madras Division of Military Works, which comprises the Madras and Southern Military districts, I concur with my predecessor Colonel Tomkins in thinking it too extensive and unwieldy to be administered with success by one Executive Engineer, however much his staff may be increased.

2. Matters that require personal attention by the Executive Engineer to the exclusion of his assistants are so numerous in connection with one military district that when two are under his administration attention cannot be given to the work that is expected. For instance, none of the stations of Calicut, Cannanore and Malapuram, at each of which there is a detachment of British troops and at Cannanore a fort, have yet been visited by the Executive Engineer, Madras Division. It is simply impossible for him to look after works at these stations on the West Coast without prejudice to his work at Wellington and on the East Coast. What I propose for the

approval of His Excellency is that the Madras Division Military Works should be confined to the Madras Military district and a new division created to be called the Southern Division Military Works. The head-quarters would conveniently be at Wellington not only on account of climate and central position but also because it is the head-quarters of the military district. It is there that our chief expenditure will take place and it would be a convenient station for the manufacture of barrack furniture for use at Wellington, Malapuram, Calicut and Cannanore. The Executive Engineer, Southern Division Military Works, would also have to look after the military staff buildings at Ootacamund and other stations, such as Trichinopoly. The financial result of this proposal is that the establishment would cost Rs. 20,170 per annum and the probable expenditure per annum on all heads, unless any specially large works were sanctioned, would be about Rs. 1,45,000. The proportion of establishment to expenditure would thus stand at about 14 per cent.; but the Madras Division establishment would be reduced by Rs. 10,000 which is the amount of the present establishment at Wellington administering an expenditure of Rs. 71,000, so that it will be seen that the proportion of establishment to expenditure remains about the same. It appears from page 2 of Madras Military budget, 1891–92, that the allotment of Rs. 16,600 made by the Director-General pays for the establishment that administers the Military Works in charge of the Public Works Department at the stations which are detailed on page 8; all these are in the Madras and Southern Military districts. Hence our proposal to take over the work at these stations for an extra 10,000 to our establishment exhibits an economy of Rs. 6,000. It is not impossible but that we may find that in actual working a greater number of native subordinates may be required than I have assumed owing to the great distances between the various military stations and their remoteness from railway lines, and, consequently, the establishment may involve a greater sum than Rs. 10,000, but I think that, if the proposals now submitted are accepted, the Executive Engineers of Madras and the Southern Divisions will be able to cope with the work at military stations now performed by the Public Works Department in addition to what is already in the hands of the Executive Engineer, Madras.

3. Attached is a detailed statement from which the totals mentioned above are derived.

No. 2261 M.W. (2)

It is assumed that, under the above proposals, the Madras Division Military Works will take over all the military stations comprised in the Madras Military district, now administered by the Public Works Department, *e.g.*, Berhampore and Vizianagrum. Please state if this assumption is correct.

2. No mention is made in the above letter of the station of Mangalore in the military district of Belgaum, which, if it is to continue to remain under the control of the Public Works Department, will be the only Indian station of this command occupied by troops, not in charge of the Military Works Department, should his proposals be sanctioned by the Government of India. The Chief Engineer, Military Works, is accordingly requested to favour this office with his opinion as to whether this station could not also be taken over by the Military Works Department and form a portion of the Military Works division of Belgaum, thus bringing all the military stations in India occupied by Madras troops under the administration of one department.

3. With reference to the proposal that furniture required for stations in the Southern division should be made up at Wellington, his opinion is requested as to whether such an arrangement would not involve increased expenditure owing to the cost of conveying material, &c., for manufacture up the ghât and of furniture between Wellington and Mettupálaiyam.

4. Information should also be afforded as to whether on the Military Works Department taking over the military buildings at Ootacamund and the other stations referred to, it is proposed to maintain a Military Works establishment at each such station for carrying out repairs, &c.

Please return.

Memo. from Colonel B. LOVETT, R.E., Chief Engineer, Military Works, Madras Command, dated Ootacamund, 20th October 1891, No. 8626. (3)

[*Quartermaster-General.*]

I would propose as suggested in your memo. No. (2) that the Military Works Department should take over the whole of the military stations in the Madras Presidency.

This will involve an annual expenditure of Rs. 4,320 for establishment in addition to the sum of Rs. 20,172 stated to be necessary in memo. No. (1) for the Southern division.

The additional establishment required is shown in the accompanying table:—

Name of executive division.	Name of station.	Proposed establishment.	Pay	
			Per mensem.	Per annum.
			Rs.	Rs.
Belgaum	Mangalore	1 overseer	80	
	Berhampore	1 upper subordinate	100	
Madras	Vizianagrum, Vizagapatam	4 temporary sub-overseers	140	
	Sámalkóta ..	1 clerk	40	
		Total ..	360	4,320

2. As regards the question of the establishment of a depôt for making up and repairing barrack furniture at Wellington, the matter will be carefully gone into if the present proposals are sanctioned; but generally speaking it is found more economical to have these articles made on a large scale and issued to out-stations than making up locally under inefficient or insufficient supervision.

3. Should the Government of India approve of these proposals, a Military Work establishment will be kept up at all the stations referred to for carrying out repairs, &c.
