Sir

With reference to your endorsement No. 329 P.W.S. of 2nd August 1892 on Chief Engineer's Memo No. 67 D of 29th July 1892, I have the honor to inform you that certain Instruments were first indentured on England for Tank Restoration Scheme when it was formed in 1885 under Irrigation Service, but, before the receipt of Instruments as the parties of Tank Restoration Scheme were in need of them, they were supplied from the Provincial Stock of Public Works Stores, and adjustments effected for their value.

Subsequently on receipt of the Instruments from England in 1886 they were kept separate and accounted for under Irrigation Service in Public Works Stores as they are not required by the Tank Restoration Parties for whom they were obtained.

R. S.

Examiner of P.W. Accounts in his
Audit Report of Public Works Stores Ledgers
for 1891 directed to transfer them to Pro-
-vincial Stock by obtaining a grant
under Provincial Service to afford credit
to Irrigation to which the value of these
Instruments were originally debited and thus
expunge the accounting of the same kind of
Instruments at a varied prices under different
Services. application for funds under Provincial
Services have accordingly been made and
sanctioned in G.O. No. 2718 W^d/14 October 1891.

As regards the stores transferred from
P.W. Workshops, I have to state that when In-
-struments or Tools are found to be in excess
of the requirements, they are transferred
to P.W. Stores at a valuation and the liabilities
of the shops thus reduced.

The charges shown against wooden
Cash chests and plotting scales are not
complete charges, but they represent outlay
incurred to end of March last, and adjusted
in transfer to this Division under Code para
912. Ch. 13 of Code Volume 2 when final bills
are received which will be sent on completion
of the jobs, proper charges will be made to articles.

As Iron Cash Chests were continued
and abandoned, the materials will be returned.
Boxwood scales can be manufactured by the
P.W. Workshops as there is a machine to make
the necessary scales to complete the missing parts
of sets when the second hand scales are re-
turned by the Divisions.

This machine has not been used
before.
