No. 3297

3397

Ootacamund Municipal Office.

27.5.71
11 November 1892.

From

The Hon. G. Hammett, C.S.C.
Chairman,
Ootacamund Municipal Council.

To

The Honorable J. F. Price
Chief Secretary to the Government
Fort St. George

Sir,

592 S.D. 26.10.92
With reference to G.O. dated the 19 October 1892, No. 1709 h. his: requesting that the Municipal Council - Ootacamund will either pay the price fixed by the Executive Engineer for the materials referred to by him, or show - valid reason for refusal to do so, I have the honor to annex the Resolution passed by the Council at a meeting held on the 10th instant.

"Resolved that the iron actually used for Municipal works be paid for at the price fixed by the Executive Engineer, and that the remainder be returned to that officer as not being required by the Municipality at present."

2.

With reference to this resolution I beg to explain that the Executive Engineer in submitting the question of payment has failed to draw the attention of the Government

to order in the Public works Department No. 1418 W. dated 8th June 1892, which directed that

"The Municipality will be required to pay a fair valuation to be fixed by the Superintending Engineer for the materials it has utilized, while such of the materials as have been returned to the Mill House may be sold to the Municipality if it desires to purchase them."

3. The Municipality, it will be seen, is willing to pay the valuation put by the Superintending Engineer on the materials it has utilized and particularized in the report and Statement of the Municipal Engineer No. 297 dated 17th August 1892. Copies enclosed.

I have the honor to be,

Sir,

Your most obedient servant

W. Hammett
Chairman Corp.

Communicated with
G.O. of 21 June 1892
No. 1016 to Secy.

No. 297

In Continuation of my report No. 180 of 22nd June 92 re Mill House Corrugated Iron.

I beg to submit herewith a statement showing the quantity of such Iron lying at the Mill House and those used for "other" Municipal works. As regards the Mill House there are at present...

197 Sheets of 8 feet long.

20 " of 7 "

36 " of 8 "

Estimated to weigh 2 Tons 2.4 Cwt.

The total quantity of Corrugated Iron used for other Municipal works as described in detail in the accompanying Statement are:-

12 Sheets of 8 feet long.

113 " 7 " ...

28 " 8 " ...

Estimated to weigh in all 1 Ton 8.5 cwt

Total weight 3 1/2 Tons.

These materials were indeed very old, having been used on the now dismantled sheds at the Mill House premises for several years, and would have hardly fetched

may above half their original

At the rate the value of the Iron lying at the Mill House will be

At 286

these used for other Municipal works: At 192
478

 24334

In para 3 of G.O. No 1718W
 dated 8 June 1892, it was
 ordered that the Municipality
 should be required to pay a
 fair valuation to be fixed
 by the Suply. Engineer for the
 materials it had utilised,
 while such of the materials
 as had been returned to
 the Mill House might be
 sold to the Municipality
 if it desired to purchase
 them.

2. It is observed that the
 Municipality is prepared to pay
 the valuation fixed by the
 Suply. Engineer for the
 materials used up by it, and
 the amount will be recovered
 accordingly, but as the Municipality
 does not desire to purchase the
 materials returned to the
 Mill House, the last mentioned
 stones will be disposed of by
 the Suply. Engineer to the
 best advantage.
