* This is the maximum number of population calculated according to the percentage fixed in paragraph 2 of Board's Proceedings, dated 7th June 1892, No. 411. The delta taluks of Gudivada, Bandar, Rapalle and Bapatha and portions of Nuzvid and Bezavada, which have the benefit of Kistna irrigation, are for the most part, if not wholly, safe against famine and the numbers requiring relief are considerably small. The percentages shown in column 6 against some of the upland taluks are below 20 and persons requiring relief in these taluks will naturally resort to the other taluks of the district where there are large works.

2. There are no land improvement works carried out by the aid of loans.

RESOLUTION—dated 22nd October 1892, No. 696.

The programme of relief works for 1892-93, received from the Collector of Kistna, will be submitted for the information of Government in continuation of Board's Proceedings, dated 10th October 1892, No. 676.

2. When the works in the wholly deltaic taluks of Repalle, Bapatla, Gudivada and Bandar are excluded, as the taluks have been exempted from the operation of the rules for the preparation of programmes of famine relief works under G.O., No. 991, dated 21st September 1892, the list consists mostly of works for the construction and repair of roads and includes one irrigation work only in each of the Guntur, Vinukonda and Nandigama taluks. These works are estimated to cost Rs. 13,69,280, which amount is calculated to give employment for three months to 181,900 persons or only 16 per cent. of the population as per recent census. Provision for only 7 per cent. of population is made in Nuzvid, but as a portion of this taluk has the benefit of the Kistna irrigation, it is considered safe against famine and the numbers requiring relief in it are small. The percentage of population provided for in Vissannapet is 10, in Guntur and Narsaraopet 12, in Palnad 13, and in Sattenapalle and Nandigama 17. Owing to the proximity of the delta, where there is a large demand for labour almost throughout the year, either in connection with cultivation or in clearing or repairing the canals, the list should suffice. Estimates are reported to be ready for works costing Rs. 4,08,700. The Collector states that no land improvement works can be carried out by the aid of State loans. He will be requested to reconsider this, as recent experience has shown that some loans for sinking wells at least may be

applied for in parts of the district. It should also be stated why a larger provision cannot be made for the repair of irrigation works, a considerable number of which are shown by statement B to be out of order.

3. The Collector should have explained why the marginally-noted works said to be available for the employment of famine labour during 1892-93 in the Public Works Department lists communicated with Board's Proceedings, dated 8th June 1892, No. 412, have not been included in the programme and why Rs. 1,30,000 is entered for Dondapad tank restoration against Rs. 1,07,000 given in the Public Works Department list.
