PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following Proceedings of

The Board of Revenue, Revenue Settlement and Records
 dated 26th July 1892 No 2025 and
 and Agriculture on letter from the Director of Bellary
 dated 25th February 1892, No 1195

814
 "Deepening the Shipar Tank in the Bellary Taluk" is one of the works selected by you (see my Famine Slip No 8) for execution as famine relief work if the necessity should arise. This you will remember is the Tank intended to supply Bellary Town and Cantonment with water. It was inspected by His Excellency the Governor and was ordered to be visited by the Sanitary Engineer to Government. Should consider that course advisable, and after the preparation of estimates by him. Mr Jones now sends me an estimate for Rs 81,900 for this work and requests me to let him know when the work will be put in hand that he may send up a man to supervise it.

2 It is evident that this scheme is quite different from those proposed by the Joint-committee that met in 1889 under Government Order No 2609 (Public Works) of 14th November 1888. which were the following. —

- A. The enlargement of the native infantary guns and the well underneath it. Rs 10,000. To be the exclusively a military charge.
- B. Pipes or closed drains for conveyance of supply from the ship and fish tanks to the fort ditch. Rs 10,000. Charge divisible equally between military and municipal funds.
- C. Pipes for taking water from the fort ditch to cisterns from which the town & Bazar population may be permitted to draw. Rs 10,000. & municipal charge.
- D. The improvement of the ship tank supply channel. Rs 20,000. Charge divisible equally.
- E. Increase of storage capacity of the fort ditch. Rs 10,000. Specified. — do —
- Should the question as to how the charges of the present scheme are to be met.
3. The report of the above mentioned committee was, pending result of the investigation of the Tungabhadra project, deferred by Government in Government Order No. 1317 N. dated 17 May 1889.
- This (the Tungabhadra channel project) was finally abandoned in Government Order No. 5210. P. N. dated 29 October 1889.
4. As the Scheme sketched out by the Sanitary Engineer will provide water for the whole of the Bellary town and Cantonment, it seems to me equitable

equitable that the cost should be met partly by municipal funds and partly by the military department.

The estimate includes the following works:—

Earthwork	52,864
Rough stone dm	16,389
Lowered rubble m	1,062
Churns	900
Compensation	10,685
Establishment	81,900

814/2

5. I have the honor to request that I may be favored with orders as to the source from which the balance due is to be met and whether in any case the work should be begun as a Famine Relief Work for which the Earthwork is admirably suited.

6. I should mention that, so far as I can judge the execution of the complete scheme cannot come to less than Rs 1,50,000; but as to this Mr Jones is the best judge. This work on the ship tank is only a portion of his proposals as I understand them.

Resolution

The Director may include the ship tank works in the list of works selected for relief purposes called for under Section 35 of the Famine Code in Board's Proceedings dated 13 January 1892, No. 430 which he has not yet submitted and

and then if the list be approved of by the Government,
 it may be put in hand when the collector finds
 it necessary to do so. If the work be undertaken
 for relief purposes, the question of debiting the
 cost will be decided subsequently. In the mean-
 while, the collector's attention will be drawn
 to the Board's remarks made in para 4th
 Proceedings 25th January 1892, N^o 58 and
 he will be requested to expedite the submission
 of the list and estimates called for by Government.

Order thereon, 5th March 1892, N^o 1249.

Recorded.
