GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads.
Civil Works.

READ—the following papers :—

From Major A. W. SMART, R.E., Executive Engineer, North Arcot Division, to the Superintending Engineer, IV Circle, dated 16th March 1893, No. 708 S.E.

With reference to para. 54 of the Examiner's report printed with G.O., No. 282 W., of 4th February 1893, communicated with your No. 74 N.A. of 26th February 1893, I have the honour to request that you will obtain sanction of Government for the employment of one temporary clerk on Rs. 20 and one draftsman on Rs. 35 to sort records and to prepare two lists—one of records to be kept and the other of those to be destroyed.

2. I enclose the necessary proposition statement.

3. The records in this division date from so far back as 1860; but most of these are kept in sacks in the Palkonda mahal in the fort of Vellore, while those from 1880–81 are kept in almyrahs. It is very desirable that all valueless records should be destroyed; it will certainly take six months for the records and *plans* to be properly sorted.

No. 100 W.

Forwarded to the Chief Engineer, Public Works Department, with a request that he will be good enough to obtain the sanction of Government to the entertainment of the temporary establishment entered in the accompanying proposition statement.

(Signed) J. C. LARMINIE,
19th March 1893. Superintending Engineer, IV Circle.

From Major A. W. SMART, R.E., Superintending Engineer, IV Circle, to the Chief Engineer, Public Works Department, dated Coimbatore, 14th April 1893, No. 154 W.

With reference to your memo. No. 1661 C., dated 10th instant, I have the honour to state that I am of opinion that a draftsman would be better than a second clerk, as the former will be able to make a more intelligible list of old plans than a clerk.

Note by the Acting Chief Engineer, Public Works Department.

There is no doubt that a trained draftsman would make a better list of plans than a clerk; but I now think that if the Executive Engineer will, as he should do, first go through the plans *himself* and reject and destroy the numbers that are *palpably* useless, old useless sketches, unsigned plans of unknown intention—plans so decayed or injured as to be of no value, and so on, and so on,—a list of the remainder may well be made in at most three months and by a draftsman on Rs. 25 a month.

19th April 1893.

(Signed) G. T. WALCH.
Ag. Chief Engineer, P.W.D.

ORDER—dated 25th April 1893, No. 1142 W., Public Works.

Sanction is accorded to the entertainment of a clerk on Rs. 20 per mensem for six months and a draftsman on Rs. 25 per mensem for three months to sort old records and plans in the North Arcot division.

2. The suggestions of the Chief Engineer in regard to the sorting of plans should be attended to.

3. This sanction has been registered as Provincial No. 12 W. of 1893-94 and classified as Establishment, Temporary.

(True Extract.)

NOTES.

REFERENCE TO MADRAS P. W. D. CODE, EDITION OF 1886.

PARAS. 25 & 26.

1. The column headed "present scale" should invariably show the *sanctioned scale for the time being* and not the strength of the actual (whether above or below sanctioned) establishment as it happens to stand at the time. The "present scale" should be verified by the examiner before the proposal is submitted to government for sanction (paras. 25 and 26).

2. In the column "average or fixed pay," financial value, not mean value, should be given.

3. The financial value should in the case of progressive appointments be calculated as follows:—

(1) If the period of rise from minimum to maximum is 5 years, the average will be the minimum *plus* two-thirds, or if the appointment is a ministerial one, *plus* three-fourths, of the difference between the minimum and maximum (C. S. R., Art. 164).

(2) If the period of growth exceeds five years (as in the case of accountants) the $\frac{2}{3}$th fraction should be decreased by $\frac{1}{20}$th of the difference for every year by which the period exceeds five; the fraction for periods in excess of five years will therefore be as follows:—

6 years $= \frac{2}{3} - \frac{1}{20} = \frac{13}{20}$
7 years $= \frac{2}{3} - \frac{2}{20} = \frac{12}{20}$
8 years $= \frac{2}{3} - \frac{3}{20} = \frac{11}{20}$

and so on; so that when the period of growth is 20 years the financial value will be the exact mean.
