Proceedings of the Board of Revenue
(Land Revenue).

Dated 9 June 1892.
No. 3532 Mis

Read letter from the Collector of Malabar dated 29 April 1892

Resolution

The Board is unable to approve this estimate. The Record Room appears to be very badly designed for the purpose for which it is intended, the windows being far too wide and not opposite one another, while the wall space between ~~each~~ such two windows ~~[illegible]~~ are far too wide. But more might be made of it than will be the case if the proposals now submitted are sanctioned. There is no reason why a space of 2 feet or more should be left between the ends of the record racks and the

the wall. Three inches will suffice to keep the ends of the racks free from damp and from the attacks of white ants. A gangway 4½' wide down the centre of the room should suffice. The racks should be arranged equidistantly between the windows, and, unless the Collector thinks that they will then be too wide for convenient use should be of the same width as the wall space between the windows. The estimate should be revised with reference to these remarks.

Resolution

The Board observes that the points of the compass are not shown on the tracings as they should have been; but from the Collector's remarks as to the main passage in the left wing of tracing A it is presumed that the west is on the right hand. If this be so then for the reason assigned by the Collector, the arrangement of racks in the left wing of tracing A is approved, and the right wing body be altered to correspond the left.

Enclosures 2

Sir,

With reference to Board's Proceedings No. 3582 Mis. dated June 9, 1892 I have the honor to submit tracings showing two alternative proposals for the arrangement of racks in the record room of the new Cutchery.

2. I have been into the matter as carefully as possible and the most satisfactory arrangement as well as the one that will give the most space appears to be the one shown in the tracing marked A. The arrangement should be the same in both wings of the record room and the main passage up the room should be on the west side, so that the racks should be as far as possible from that side

side of both rooms, which is most exposed to the weather.

3. The space at the end of the Vernacular record room set apart for cadjan records is of a very awkward shape to deal with. The arrangement in the tracing B gives the following amount of rack space - $38 \times 5 \times 11\frac{3}{4}$ square feet, or $2,232\frac{1}{2}$ square feet. The arrangement shown in tracing A, if both wings are made alike, will give $16 \times 23\frac{3}{4} \times 5 + 3 \times 19\frac{1}{2} \times 5 + 2 \times 2\frac{1}{2} \times 23\frac{3}{4}$ or $2311\frac{1}{4}$ square feet, but I can see no reason why the racks should not be carried in the cadjan record portion of the Vernacular record room right up to the outer wall of the building i.e. in the direction away from the doors which would give an increase of $2\frac{1}{2} \times 4\frac{1}{4} + 3 \times 5 \times 4\frac{1}{4} = 74\frac{3}{8}$ square feet.

$$\begin{array}{r} 2311\frac{1}{4} \\ 74\frac{3}{8} \\ \hline 2385\frac{5}{8} \end{array}$$

4 - I request that early orders may be passed upon these proposals in order that Estimates may be prepared. It will probably be 3 or 4 months more before the Cutcherry is finished.
