PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper:—

Official memorandum of the Local and Municipal Department, dated 13th April 1893 N^o 229, requesting the Public Works Department to state whether it is not feasible to abate the nuisance caused by the effluvia from the Coorn by covering the exposed portions of the river bed and the banks with grass sods as is done in the frontage of the General Hospital.

Memorandum of the Public Works Department dated 3rd May 1893 N^o 1932 C.

Letter from the Consulting Architect to Government N^o 198 dated 21st April 1893.

With reference to your Memo N^o 1788 C dated 17th April 1893, I have the honor to state that the nuisance will not be mitigated to an appreciable extent by turfing the banks of the river; no doubt it may be a good thing

thing to do along the General Hospital where
the bottom of the bank is rivetted and the
bank is not sandy, as in other places which
will require to be covered with earth before
turfing.

2. Owing to insufficient rains in recent
years the river has not been scoured out
sufficiently through the bar into the sea and
a bed of decomposed matter lies at the
bottom of the river which it may not be
advisable to disturb, but all that can
be possibly done with a reasonable ex-
penditure, such as collecting the silt as it
comes to the surface and levelling it
in pits and covering the slimy edges
of the river with dry earth, is being done.

The river is in many places so shallow
that the weeds grow up almost a day after
being cleared off. the shallows are caused
by the deposit of sewage matter and if this
is disturbed to any extent the stench given
off is very bad indeed. I shall try turfing
on such places as are similarly situated
to

to the bank along the General Hospital ground

Copy forwarded to the Local and Municipal
Department, with reference to its memo N: 229
dated 13th April 1893.
