READ—the following paper:—

From W. P. AUSTIN, Esq., C.S., Chairman, Harbour Trust Board, to the Chief Secretary to Government, dated Madras, 10th May 1892, No. 471.

I have the honour to submit, for the information of Government, copy of a letter from the Board's Engineer No. 118, dated 28th April 1892, together with indent in duplicate, for duplicates of certain parts required for the new all-round Titan crane for the Madras Harbour Works and to request that it may be transmitted to the Right Honorable the Secretary of State for India for compliance.

2. I am requested to ask that if it is practicable to telegraph for this indent it may be done. The new Titan would be useless, until repaired, should any of these parts meet with an accident, and such could not be repaired locally.

ENCLOSURE.

From F. J. WILSON, Esq., Acting Engineer, Harbour Trust Board, to the Secretary, Harbour Trust Board, dated Madras, 28th April 1892, No. 118.

I have the honour to inform you that no duplicate parts have been supplied with the new all-round Titan crane and that there are several, which are liable to wear and accident, which it would be impossible to replace locally. To prevent the great delay that would occur in the event of an accident, I would recommend that duplicate parts of the machine, as entered in the accompanying indent, be procured from the makers of the crane—Messrs. Ransomes and Rapier.

2. The makers having no doubt kept their working drawings and patterns, the description given in the indent will be sufficient to indicate the parts required.

3. As I am unable to arrive at the cost of the articles indented for, I have submitted the indent without filling in the value; but, in case this is objected to, I have written to the makers to supply this information.

LETTER—to the Director-General of Stores, India Office, London, dated Fort St. George, 16th May 1892, No. 1509 W.

I am directed to forward, herewith, for favour of compliance at the earliest possible date, an indent for duplicates of certain parts required for the new all-round Titan crane in use on the Madras Harbour Works. It will be seen from the letters accompanying the indent that, should an accident happen to any of these parts meanwhile, serious delay to the works will occur. The importance of supplying the parts with all possible expedition will thus be apparent.
