RESOLUTION—dated 3rd December 1892, No. 769.

The programme of relief works for 1892-93, received from the Collector of Kurnool, will be submitted for the information of Government in continuation of Board's Proceedings, dated 29th April 1892, No. 768.

2. The programme includes provision for the construction of 21 new irrigation works at a cost of 10.48 lakhs of rupees, and repairs to irrigation works, to cost 8.18 lakhs; making 441 miles of new road, 13.10 lakhs, and repairs to existing roads, 3.06 lakhs; works intended to improve drinking-water supply, .34 lakh, and other miscellaneous works including those to be carried out with the aid of the State loans under the Land Improvement Loans Act, 1.54 lakhs. The aggregate approximate estimated cost of all works amounts to Rs. 37,62,148, and the works are calculated to afford employment for a period of three months to 501,610 persons or about 62 per cent. of the population of the district. Many of the new irrigation works and of the repairs proposed, appear, however, either not to have been fully investigated, and so should appear only as additional works outside the programme, or to be expensive repairs regarding which it is doubtful how far it is advisable to carry them out, as shown in the following list:—

Works not fully investigated (additional works).		Works the advisability of carrying out which is not definitely reported.

Omitting these works the provision is reduced to Rs. 21,63,409, so that, even if the full number of coolies could be employed thereon, the remaining works would afford employment to 35 per cent. of the population for three months at an average wage of 1½ annas per diem. The Collector will be requested to revise his programme carefully before submitting that for 1893-94. In Sirvel the proportion of the population provided for is only 15 per cent. This should be enlarged.

3. Estimates are reported to be ready for works to cost Rs. 11,83,174, and no estimates are required for land improvement works to cost Rs. 38,850.

4. No forest-fencing work is shown in the programme. No provision also is made for works to be executed by advances under the Land Improvement Loans Act in Ramallakot, Cumbum and Markapur taluks, and the provision in Nandyal and Sirvel is extremely small, being only Rs. 1,500 and Rs. 600, respectively. This estimate should be carefully revised by the light of the experience of the past season.

5. Only a few of the works given in the Public Works Department list communicated with Board's Proceedings, dated 8th June 1892, No. 412, have been shown in the detailed list of works. The reason for the omission of the rest should have been stated. It should also be stated why the Public Works Department has not made full provision for the repair of all the irrigation works in its charge.
