PROCEEDINGS OF THE BOARD OF REVENUE
(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

READ—the following letter from E. C. RAWSON, Esq., Acting Collector, Gódvári District, to the Secretary to the Commissioner of Revenue Settlement, Land Records and Agriculture, dated Cocanada, 18th April 1893, No. 63 :—

I have the honour to enclose statements of famine relief works for 1893-94 in the forms A, B and C prescribed in Board's Proceedings, dated 7th June 1892, No. 411, and to report as follows.

2. Agreeably to Board's Proceedings, dated 21st October 1892, No. 691, the delta taluks of Rámachandrapuram, Amalápuram, Narsapur, Tanuku and Bhímavaram have been excluded. I note, however, that the Board in Proceedings, dated 19th November 1892, No. 746, in submitting to Government its programme of famine relief works for 1892-93, has excluded only the first four-named taluks (see paragraph 2 of the Proceedings). Bhímavaram is as much a delta taluk as the other four.

3. The works are to cost Rs. 35,78,703 in all affording employment for 477,155 persons for three months, that is, 52·5 per cent. of the population according to last census.

4. The people in this district are not anxious to avail themselves of the advantages of State loans (see this office No. 720, dated 30th December 1892). Consequently, only a nominal provision of Rs. 5,000 under this Act has been entered.

Form C.—Abstract of programme of Famine Relief works in the Gōdāvari district for the year 1893-94.

RESOLUTION—dated 25th May 1893, No. 201.

The abstract of the programme of famine relief works for 1893-94 relating to the upland portion of the Gódvári district will be submitted for the information of Government.

2. The programme includes the two irrigation works noted on the margin,

Yernagúdem—Anumulalanka project	Rs.	which have been estimated to cost 13.55 lakhs, and provides for the construction of nine other new irrigation works at an estimated cost of 1.15 lakhs, and for repairs to irrigation works 2.64 lakhs; forest-
Bhadrachalam—New Boat Canal	9,00,000	fencing works at 95 lakh; the construction of 730 miles of new roads at 15.28 lakhs; and miscellaneous works to cost 2.22 lakhs including repairs of roads for which a provision of Rs. 2,150 only is made in one taluk. Omitting the provision made for forest-fencing works which should have been excluded from the programme with reference to the instructions contained in Board's Proceedings, dated 9th January 1893, No. 4, the total estimated cost of the works amounts to Rs. 34,83,703, and they are expected to afford employment for three months to 51 per cent. of the total population. Sufficient provision has been made in each taluk. In addition to the works included in the programme, others, estimated to cost a further sum of 13.25 lakhs, are mentioned which might be carried out as famine relief works if necessary; but they are not in a forward state of preparation.
	4,55,300	

3. A great many of the new roads proposed are mere projects for which no detailed estimates are ready, and it is uncertain whether, if they were carried out, they could be efficiently maintained by the Local Boards after the close of a famine. Breaking metal and stacking gravel on existing roads should have preference to the starting of the new roads as already recommended in Rule 11, paragraph 5 of Board's Proceedings, dated 7th June 1892, No. 411. A nominal provision of Rs. 5,000 has been made under the Land Improvement Loans Act for the whole district as the people are not anxious to avail themselves of the advantages of State loans.

4. Detailed estimates are ready for nearly 43.5 per cent. of the aggregate provision in the district. It is observed, however, that none are ready in Peddapuram, Pithapuram, Polavaram, Chodavaram and Yellavaram; and no explanation has been furnished for this omission. The estimates for the Anumulalanka project in Yernagúdem were, the Collector states, prepared in 1873 and submitted to the Chief Engineer for revision. The latter officer will be requested to inform the Board to what extent detailed estimates for this work are ready and whether it, and the Bhadrachalam boat canal, can be relied on as available relief works.

5. The following discrepancies are noticed in the Collector's statements. The length of the new roads proposed in the Ellore taluk is 201 miles according to abstract form C, while it is shown only as 185 miles in the detailed list A. The latter figure has been adopted. The repair to the Ava tank in the Yernagúdem taluk is shown in the detailed list A and the abstract form C as a large work requiring professional agency, while in the statement B, it is lumped in the minor irrigation works to be executed by the ordinary revenue staff. The necessary alterations should be made in the Collector's statements.
