10.12.8.

Vamsadhara Investigation  
Project Office.

Camp Runku Hanumanthapuram.

Date: 16<sup>th</sup> April 1893.

From:

J. E. Paul Esquire,

Executive Engineer,

Special Duty Vamsadhara -  
Investigation Project.

To:

The Chief Engineer,  
for Irrigation works  
Madras.

Sir,

With reference to your telegram  
No 26 of the 26<sup>th</sup> Instant, I have the honour  
to state, that I have not received the docu-  
ments referred to in your memo No  $\frac{1}{27.7.7}$  of  
the 28<sup>th</sup> January 1893 to the Superintending  
Engineer 1<sup>st</sup> circle, and therefore, I am not  
in position to estimate my requirements  
as to the establishment required.

(2) For the present I propose that the  
establishment sanctioned in G. O,  
1<sup>st</sup> December 1892, No 3282 W, as modi-  
fied in 194 W dated 27<sup>th</sup> January 1893,  
should be continued for another year.

(3) I also propose that Temporary  
overseer

On 8.2  
4430/13

overseer in R. R. J. Ravi & Naidu, if  
he cannot now be confirmed as a  
permanent overseer, be promoted in  
the temporary list as a Supervisor 2<sup>nd</sup>  
grade; in my opinion he thoroughly  
deserves such promotion, and it  
seems advisable that he should  
draw in his temporary post more salary  
than the Surveyors.

(4) I also recommend that the clerk  
be allowed to draw Rs 30 instead of  
Rs 25, his clerical work is of the  
lightest and simplest description,  
but as he is continually travelling,  
the life is most unpleasant and  
expensive for a clerk.

(5) After obtaining the documents  
concerning Palacanda, for which  
I will go to Walahair, and at the same  
time talk over the matter with Mr. Ford,  
and after visiting Palacanda,  
I will apply for additional Surveyors  
if

if it seems necessary, but I very much  
doubt whether much can be done now  
in the way of surveying and levelling  
until the rains are over. 1803/3

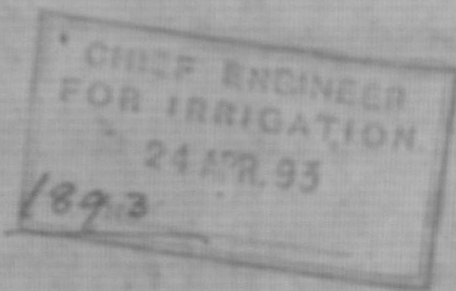

(6) It is also quite possible that the  
levels of the main channels for the  
Vamsadhara Project, which should  
be completed in a month, will show  
that the idea of converting the present  
channel irrigation system into an  
Ancient system is not financially  
advisable. If so, the two surveyors  
can be transferred to the Palacanda  
work.

I have the honour to be,  
Sir,

Your most obedient servant.

H. Paul.  
Executive Engineer  
on special duty Vamsadhara  
Investigation Project.

Clerk.

Spec.

With reference to your memo. No 44. G. N.  
dated 31<sup>st</sup> May 1893, I have the honour to  
report that in January and February 1893,  
I had an attack of fever followed by a  
bowel complaint which I had some  
difficulty in getting rid of. Consequently,  
though I was with the party, I had to  
leave a good deal of work which I  
should otherwise have done to Periah Naidu.  
After that I had to spend about two  
months in going over the ground in  
advance of the party, and all June  
I spent in Palkonda; Periah Naidu  
has

1863  
/ 7

has therefore actually been employed  
on the work of a Sub Divisional Officer,  
namely, in running the base line for  
the levels. Laying it down with the  
theodolite being in direct charge of  
the party. He has worked remarkably  
well while he has been with me and  
I find Messrs. Walsh and de Morgan  
and Hayes have on previous occasions  
all strongly recommended that he  
should be brought on the permanent  
establishment as soon as a vacancy  
may occur. His permanent appointment  
is that of a Sub Overseer 1<sup>st</sup> grade  
which he obtained on my recom-  
mendation in May 1885, he passed  
the Supervisor's Test in the Madras College  
in 1884.

Thank the honourble

Sir

Your most obedient servant
