PROCEEDINGS OF THE MADRAS GOVERNMENT.

~~Present the following papers~~Order dated 24th August 1893, N^o. 308.

With reference to G.O. 15th August 1893, N^o. 292, the Government is of opinion that before any further action in respect of the estimate for the construction of a new pier at Tuticorin is taken, it is desirable that the exact site of the pier should be considered and reported on by a Committee on the spot and representing local interests. There appears to be a doubt whether the site of the old pier is the best with reference to general convenience and to facility of connecting the pier with the railway, an object of manifest importance.

2. His Excellency the Governor in Council therefore resolves to direct the Collector of Tinnevely to convene such a Committee as soon as possible. The Collector will be Chairman; the Port Officer Tuticorin and Major Brassey R.E. will join the Committee, and the Collector should request one European and one Native Merchant of Tuticorin to serve as members. It is also desirable that the Committee should include a representative of the South Indian Railway and the Agent will be requested in the Public Works Department, Railway Branch, to be so good as to depute the Chief or Deputy Chief Engineer of the Company to

to join it.

3. The effect of a change of site on the estimate for the pier will of course be considered by the Committee. The report should be accompanied by a map of the locality.
