READ—letter from the Collector of Nellore, dated 8th July 1893, No. 1747-Tour.

ABSTRACT.—Explaining delay in submitting programme of famine relief works for 1893-94.

RESOLUTION—dated 7th August 1893, No. 330.

The abstract of the programme of famine relief works for 1893-94 received from the Collector of Nellore with the first of his letters read above will be submitted for the information of Government.

2. The programme includes provision for the construction of fourteen new irrigation works estimated to cost 4.64 lakhs and repairs to existing works 11.90 lakhs; the construction of new roads and repairs to existing roads to cost 27.65 lakhs and 10.50 lakhs, respectively; works calculated to improve the supply of drinking-water to cost 2.75 lakhs, and other miscellaneous works 1.80 lakhs. The last item includes a provision of 25 lakh for land improvement works to be carried out by means of State loans.

3. The irrigation works mentioned in the subjoined statement and shown in the detailed list A of the Collector as additional works are erroneously included in the programme prepared in form C—*vide* rule 9 under paragraph 5 of Board's Proceedings, No. 411, dated 7th June 1892—

Taluk.	Works	Approximate cost.
		RS.
Ongole	Supply channel from the Musi to Chimakurti, Santanatalapad, Yendhur tanks ...	50,000
	Addanki tank works ...	30,000
	Allur Chapayya tank ...	12,000
	Do. Chekrayya tank ...	12,000
Kandukur	Mopaud (new) tank ...	25,000
	Supply channel from Paleru to Pakala ...	20,000
	Repairing Hanumantharayadu cheruvu at Pandoa Nagalavaram ...	20,000
Kanigiri	Constructing a tank at Mogilicheruvu ...	10,000
	Supply channel from Mannara river to Inemerla tank ...	5,000
	Constructing a tank between Hajeepuram and Bommireddipalli ...	6,000
Nellore	Nellore tank supply channel ...	1,80,000
	Repair to Bhimavaram tank and its supply channel ...	5,000
Udayagiri	Bandiganipalli Mahabunda tank ...	6,000
	Guravadi old tank ...	5,000
	Gandipalem tank project ...	3,00,000
	Chabolu Monla tank ...	6,000
	Total ...	6,92,000

Omitting the above works from the programme, the total provision amounts to Rs. 52,31,638—a sum sufficient to provide employment during a period of three months for 697,552 people, or 47.6 per cent. of the total population of the district.

4. The exclusion of the irrigation projects above referred to will reduce the provision under the irrigation works to 9.61 lakhs. The largest provision occurs under the construction and repair of roads on which it is proposed to expend 38 lakhs of rupees. The Collector is requested to report whether all these works have been proposed by the Local and Municipal Boards. It is well to bear in mind in preparing these programmes that as a rule no roads will be undertaken as relief works which cannot be efficiently maintained by Local and Municipal Boards after distress is over. The provision made under the land improvement works is small and should be increased. The total provision made is, on the whole, ample in all taluks.

5. Detailed estimates are ready for works estimated to cost Rs. 17,50,049 or 33.6 per cent. of the total provision, exclusive of the land improvement works for which no estimates are required.

Taluk.	Work.	Amount.
		RS.
Nellore	Allur Ramana tank ...	8,000
	Bettipad embankment ...	6,000
Atmakur	Atmakur tank supply channel ...	10,000
	Rambala tank repairs ...	5,000
	Sayapet do. ...	5,000
Kavali	Mungamoor do. ...	5,000
	Cutting a canal from Kavali to the Buckingham canal via Tummalapenta ...	60,000

6. With reference to the works noted on the margin for which detailed estimates are not ready and the additional irrigation works referred to in paragraph 3 *supra*, the Chief Engineer for Irrigation will be requested to inform the Board whether they may be relied on as available relief works that could be taken in hand on an emergency.

7. The total cost of repairs of roads in Kandukur as entered in list A is Rs. 1,57,500, but the total of the details comes up to only Rs. 1,57,000. The total length of all the new roads in the district is entered as 1,214 $\frac{1}{2}$ miles under column 16 of form C; but the talukwar details do not work up to that figure. These discrepancies should be explained.

The total length of the new roads in Kanigiri should be 100 miles and not 10 as shown in list A. The entry in form C of Rs. 26,700 as the estimate of the two large works in Kanigiri is a mistake for Rs. 16,700.

The lengths of the new roads Nos. 5 and 7 in Podili, No. 12 in Darsi, of all new roads in Rapur, of the six new roads Nos. 19 to 24 and 26 in Gudur and of seven others in Udayagiri, are not entered in the detailed list A; the omission should be supplied.

The number and cost of large works in the Venkatagiri division for which estimates are ready are 2 and Rs. 89,770 as shown in list A, while, according to the form C, they are 11 and Rs. 2,21,170. It is presumed that the mistake has arisen from erroneously treating all the proposed new roads as having detailed estimates ready. The entry in the detailed list of 45 and Rs. 4,58,919 as the total number and cost of all works for which estimates are ready in this division appears to be a mistake for 36 and Rs. 1,27,519.

The number of new roads proposed to be constructed in Kavali taluk should be 6 and not 13 as entered in form C.

The provision made for land improvement works should have been shown under columns 22 and 23 of form C instead of under columns 20 and 21.

The approximate cost given in Statement A of repairing road No. 2 in Rapur and of road No. 4 in Venkatagiri division differs from the amounts of their detailed estimates given in column 4 of list A. In all cases in which the detailed estimates are ready, the amounts of these estimates should be entered in the column for approximate cost.

8. The Collector will be requested to submit a revised Statement C in the light of the above remarks. Statement B should also be revised by eliminating therefrom all "additional" and new irrigation works; it should in columns 6 to 11 include only works for whose repair a provision is made in the programme.
