No. 1998

Superintending Engineer's Office,

3RD CIRCLE,

Bellary 8 November 1893,

FROM

Colonel A. J. Fraser R.E.

SUPERINTENDING ENGINEER.

IIIRD CIRCLE.

To

THE Chief Engineer,
P.W.D.

Madras.

Sir,

Enclosures.

With reference to Chief Engineer's Nos. 3484C & 3569C of the 27th October and 2nd Instant respectively I have the honor to state that even if Ferro-Prussiate paper were available in the Stores of the Superintendent of Stationery it is no use without the accessories of tracing wellum and a printing frame. Ordinary tracing cloth will not do, as the lines are too translucent.

2. The purchases were made in connection with a necessity that arose about the Sagiler Upper Scheme plans.

3. The Executive Engineer Buddapah had contract documents (ordered by the Board) to prepare, and just then his draftsman got ill, dying subsequently.

4. Under the circumstances I advised his

at

at once sending to Bombay for a roll each of
vellum and Prussiate paper with frames.

5. Having also to supply a draftsman from
this Office to fill the vacancy crippled it, and I took
the opportunity to order a roll of Terra-Gallic paper
for my Office and one of Terra Prussiate paper for the
Bellay Office, with a frame common to both Offices.

6. Being thus provided with a minimum
equipment to start with the Stationery Office can be
looked to as a future source of supply, but some
modification will be advisable in the present
rather strict rules about extra indents as Heliographic
paper is not improved by keeping.

I have the honor to be

Sir

Your most obedient servant

C. Fraser L.A.R.C.

Suplt. Engineer, III Circle.

P. W. CURRENT No. 9542
