Plastering ~~on the interior of the building~~  
is to be plastered with 2 coats of chunnam  
& the exterior plastered with Portland cement  
Flooring is to be of 2 1/2" of Portland cement concrete  
with 3 1/2" of ordinary concrete &  
plastered with 1/2" of Portland cement  
Roofing is to be of galvanized iron tiles laid over  
teak rafters supported by teak trusses  
etc. complete

Doors and Windows are to be of the description  
which in the estimate of teakwood &  
painted with 3 coats of cadams dark paint  
Roof timbers are to be of teakwood & painted  
with 3 coats of green white paint  
cantlings are correct.

ates many of the rates cannot be checked  
as the Schedule is very meagre. but data  
has been submitted in support of them  
The plinth area of the main building is  
5495 square feet, and the cost per square  
foot will be Rs. 2.15.6.

The plan and estimates have been countersigned  
by the Collector, Kistna District  
and approved in the Revenue Dept.  
Department.

#### REMARKS.

This estimate has been framed with  
reference to G.O. No. 2952 dated 7<sup>th</sup>  
November 1890 & provides for construct-  
ing a Deputy Tahsildar's Office with  
attainments at Arunigadda in the  
Kistna District.

The estimate for the main building  
has been based on the type design ap-  
proved in G.O. No. 3122 dated 20<sup>th</sup>  
November 1891 & that for the out-house  
is per design approved in G.O. No.  
409 dated 28<sup>th</sup> May 1889.

The site proposed is private land  
for which compensation to the extent  
of Rs. 170 has been provided for in  
the estimate.

The verandah posts are proposed  
to be made of teak poles as per  
plan submitted. The flooring was  
originally

originally intended to be of teak  
timber laid over a leveling course  
of 6" concrete & painted with ce-  
ment but the S.E. has altered  
this description of floor to 2 1/2"  
Cement concrete laid over 3 1/2" or-  
dinary concrete & the surface  
to be plastered with Portland  
Cement by this alteration a  
saving of Rs. 2520 has been effect-  
ed.

As the site is reported to be  
"black cotton" it is submitted  
that the foundations might  
be filled in with gravel or sand  
& a plinth protection of concrete  
around the building provided.
