7TH DECEMBER 1893, No. 3186 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—the following paper :—

From F. B. HEBBERT, Esq., Under Secretary to the Government of India, Public Works Department (Railway Stores), to the Secretary to the Government of Madras, Public Works Department, dated Calcutta, 23rd November 1893, Circular No. 8 (Railway).

[Preparation in India of indents for steel.]

In Government of India Circular No. 6 (Railway), dated 3rd June 1891, it was ordered that, in sending forward indents on England for steel, the purpose for which the steel is required should be specified in every case, such specification being considered a better guide to a suitable supply than the mention of the "percentage of carbon." It would seem, however, from a report since received from the authorities at the India office that the composition of steel is still sometimes mentioned in indents and that difficulties have in consequence been recently experienced in obtaining steel as indented for owing to the percentage of carbon specified not corresponding to that of steel suitable for the purpose for which it is required.

2. I am, therefore, to say that paragraph 4 of the "suggestions" accompanying Government of India Circular No. 2 (Railway), dated 10th February 1891, is hereby cancelled, and I am to request that, in all future indents for steel, care may be taken to see that the purpose for which each item of steel is required is specified with exactness and in full detail, the composition of the metal being invariably left to be determined in England.

3. This order is, I am to add, applicable to all branches of the Public Works Department.

ORDER—dated 7th December 1893, No. 3186 W., Public Works.

Communicated to officers of the Public Works Department for information and guidance in continuation of the undermentioned orders :—

Preparation in India of Indents for Steel.

SIR,

In Government of India Circular No. 6 Railway, dated 3rd June 1891, it was ordered that, in sending forward indents on England for steel, the purpose for which the steel is required should be specified in every case, such specification being considered a better guide to a suitable supply than the mention of the "percentage of carbon." It would seem, however, from a report since received from the authorities at the India Office that the composition of steel is still sometimes mentioned in indents, and that difficulties have in consequence been recently experienced in obtaining steel as indented for, owing to the percentage of carbon specified not corresponding to that of steel suitable for the purpose for which it is required.

2. I am, therefore, to say that para. 4 of the "suggestions" accompanying Government of India Circular No. 2 Railway, dated 10th February 1891, is hereby cancelled, and I am to request that in all future indents for steel, care may be taken to see that the purpose for which each item of

steel is required is specified with exactness and in full detail, the composition of the metal being invariably left to be determined in England.

3. This order is, I am to add, applicable to all Branches of the Public Works Department.

I have the honour to be,

SIR,

Your most obedient servant,

J. B. Abbott

Under Secy. to the Govt. of India.

Documents accompanying.
